MANUFACTURING WORK PLATFORM · NOVEMBER 6, 2026

Your floor, in focus.

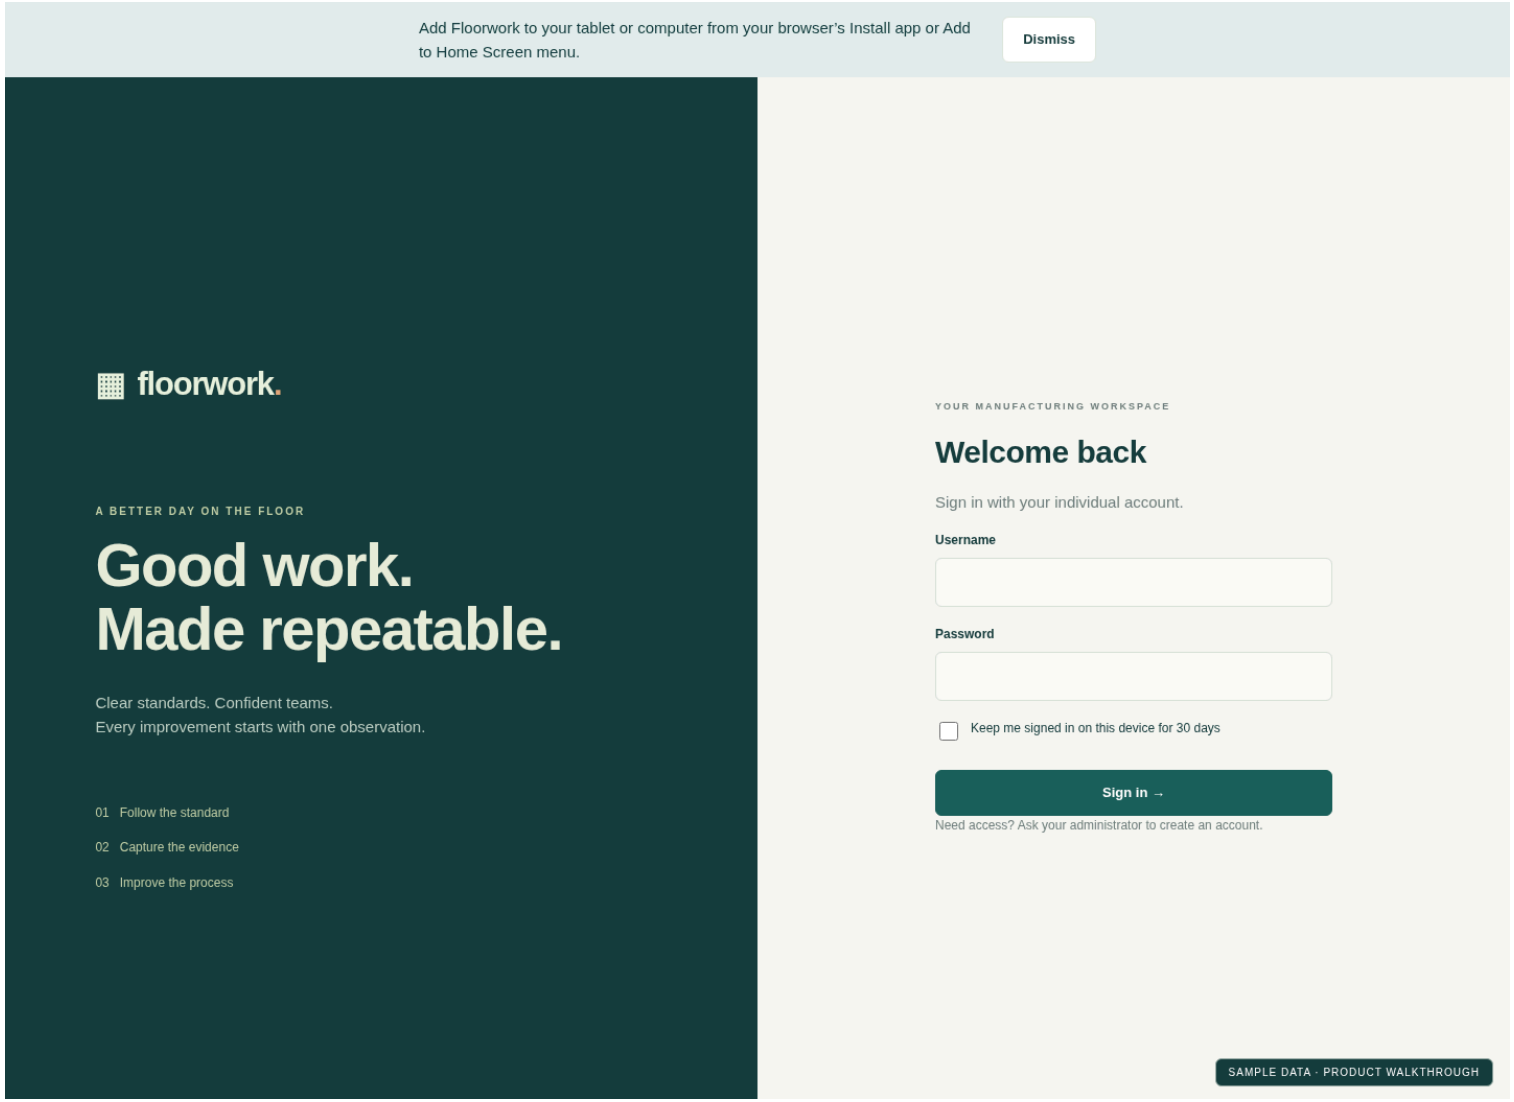

27 views of the running app: dashboards, operational workflows, improvement ideas, 2D / 4D / 8D problem solving and administration.

All screenshots use synthetic sample data. This PDF gives an overview of each screen. The downloadable PNGs and HTML walkthrough include the full pages.

The problem-solving forms follow your workbook. The two private Microsoft Forms editing pages could not be read; matching their exact wording and layout is pending readable references.

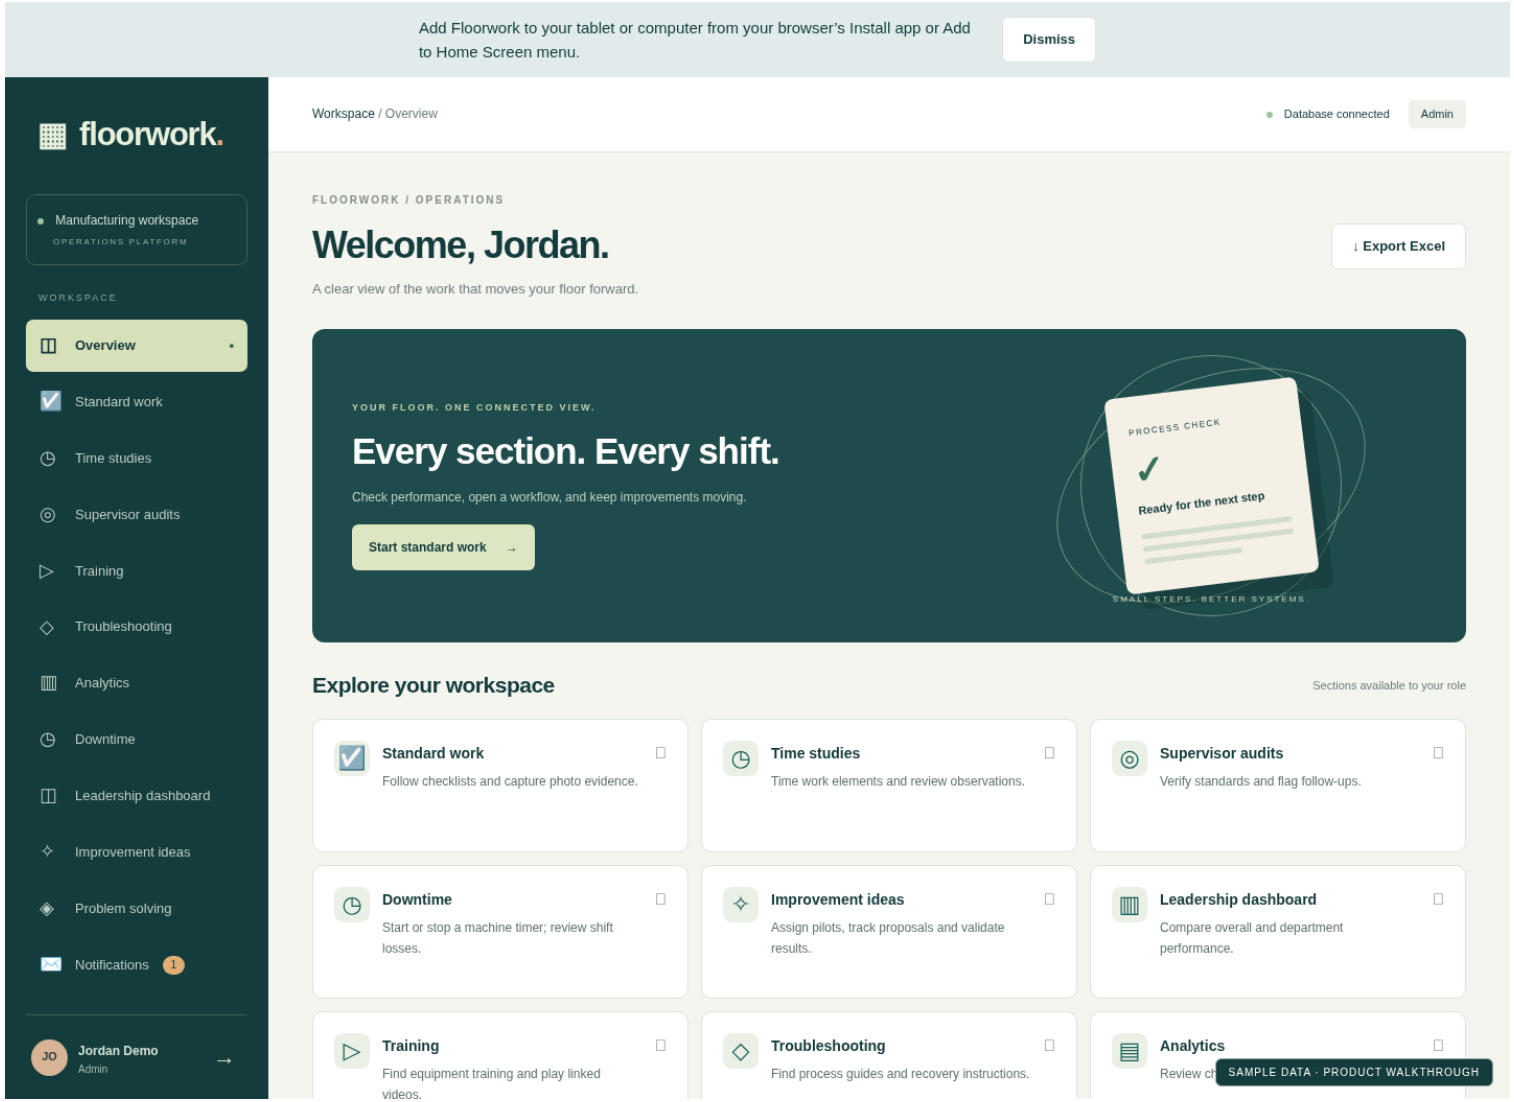

Individual sign-in

Local individual accounts, remembered sessions and password recovery through an administrator.

Workspace dashboard

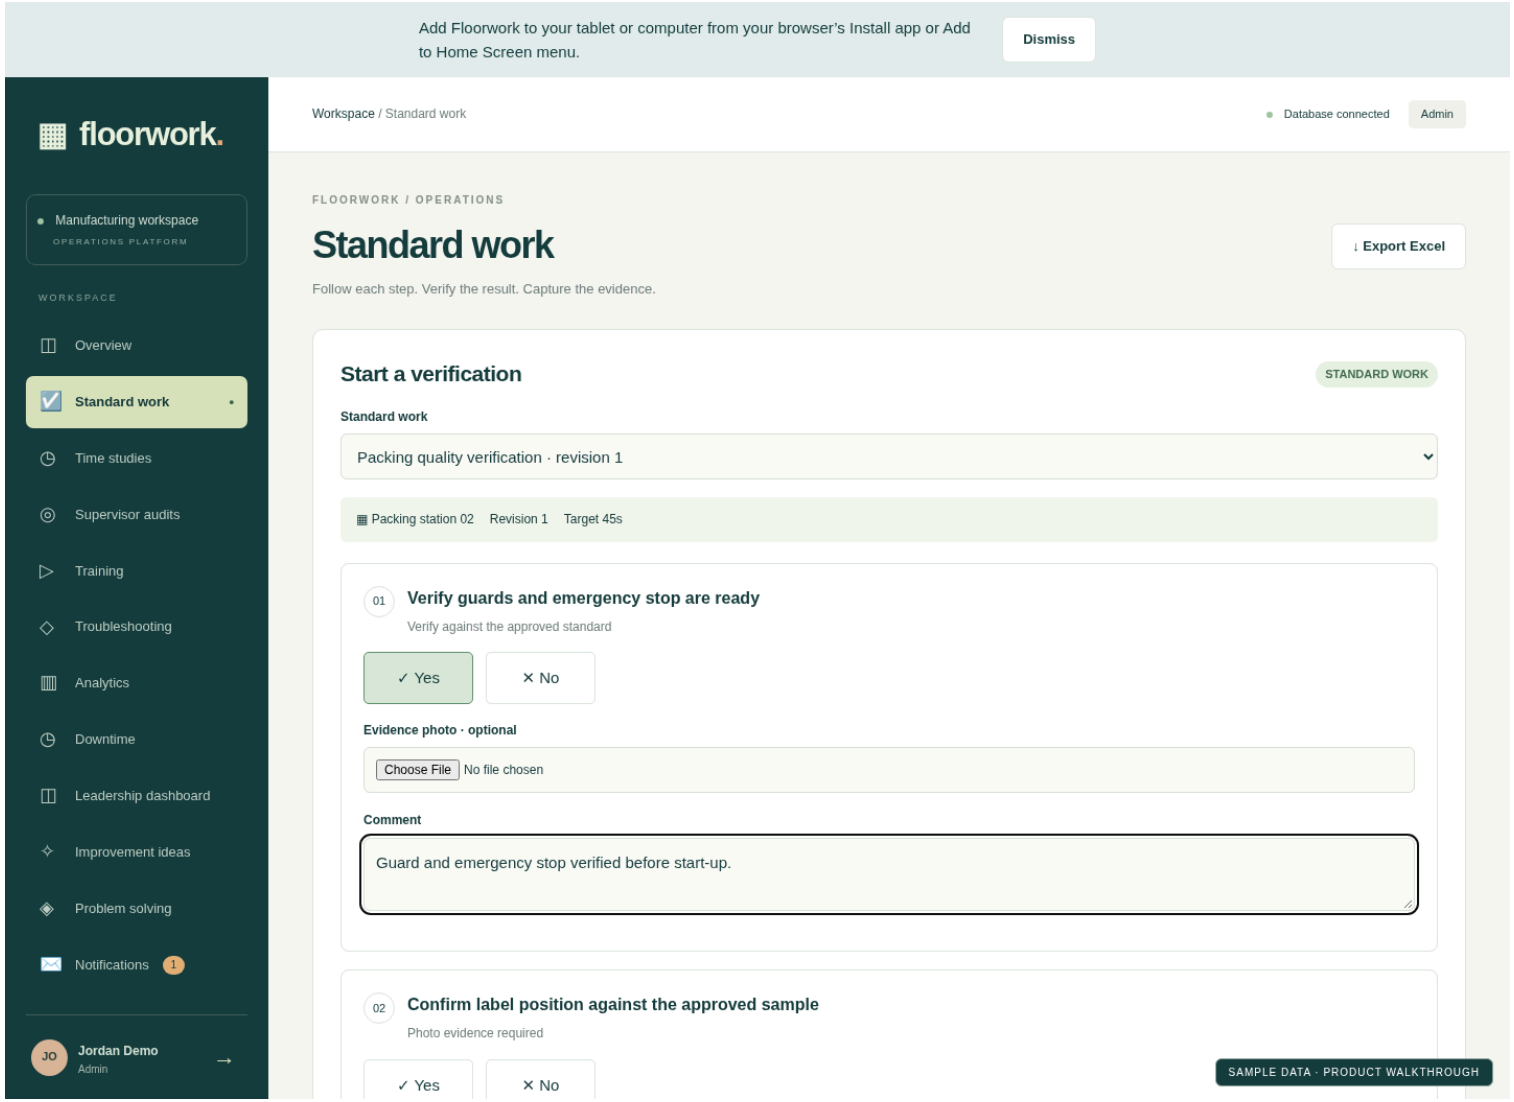

Role-aware launchpad for all sections, overall/department reporting, record totals and recent activity.

Full forms, histories and reports are in the full-size PNGs and HTML gallery. · 02-dashboard

Standard work: checklist and evidence

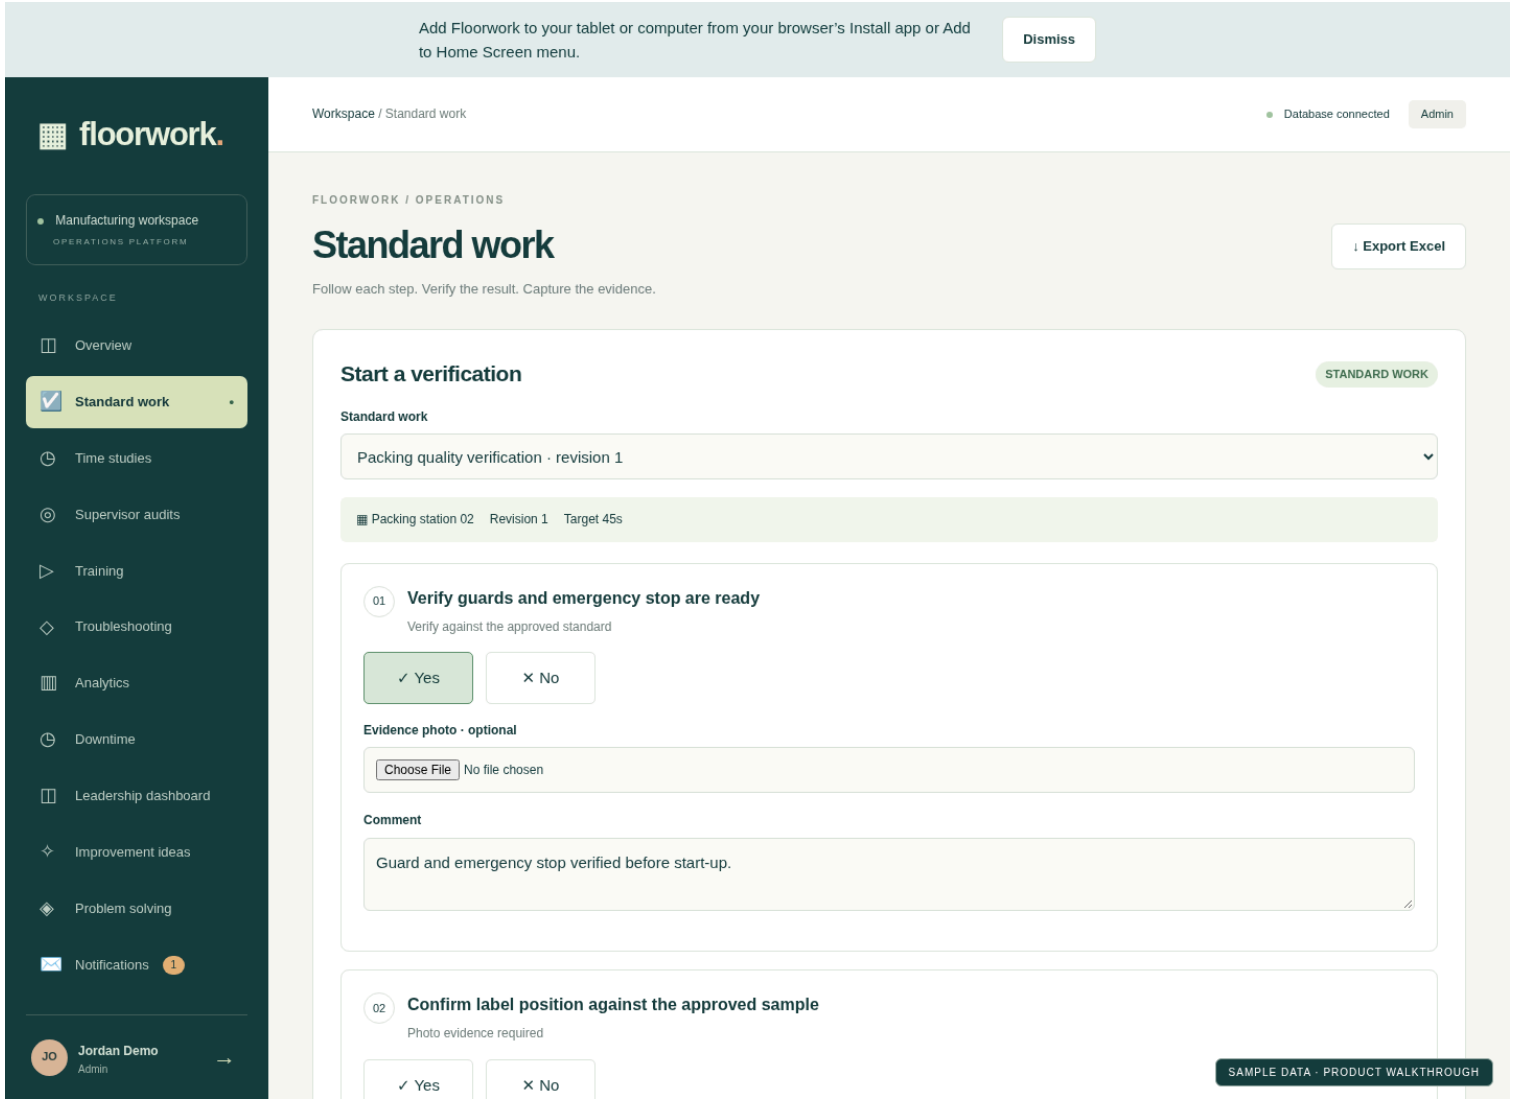

Revision-specific Yes/No checks, camera/file evidence, comments and completed verification history.

Full forms, histories and reports are in the full-size PNGs and HTML gallery. · 03-standard-work

Saved verification details

Expand a saved record to inspect the original revision, answers, comments and evidence references.

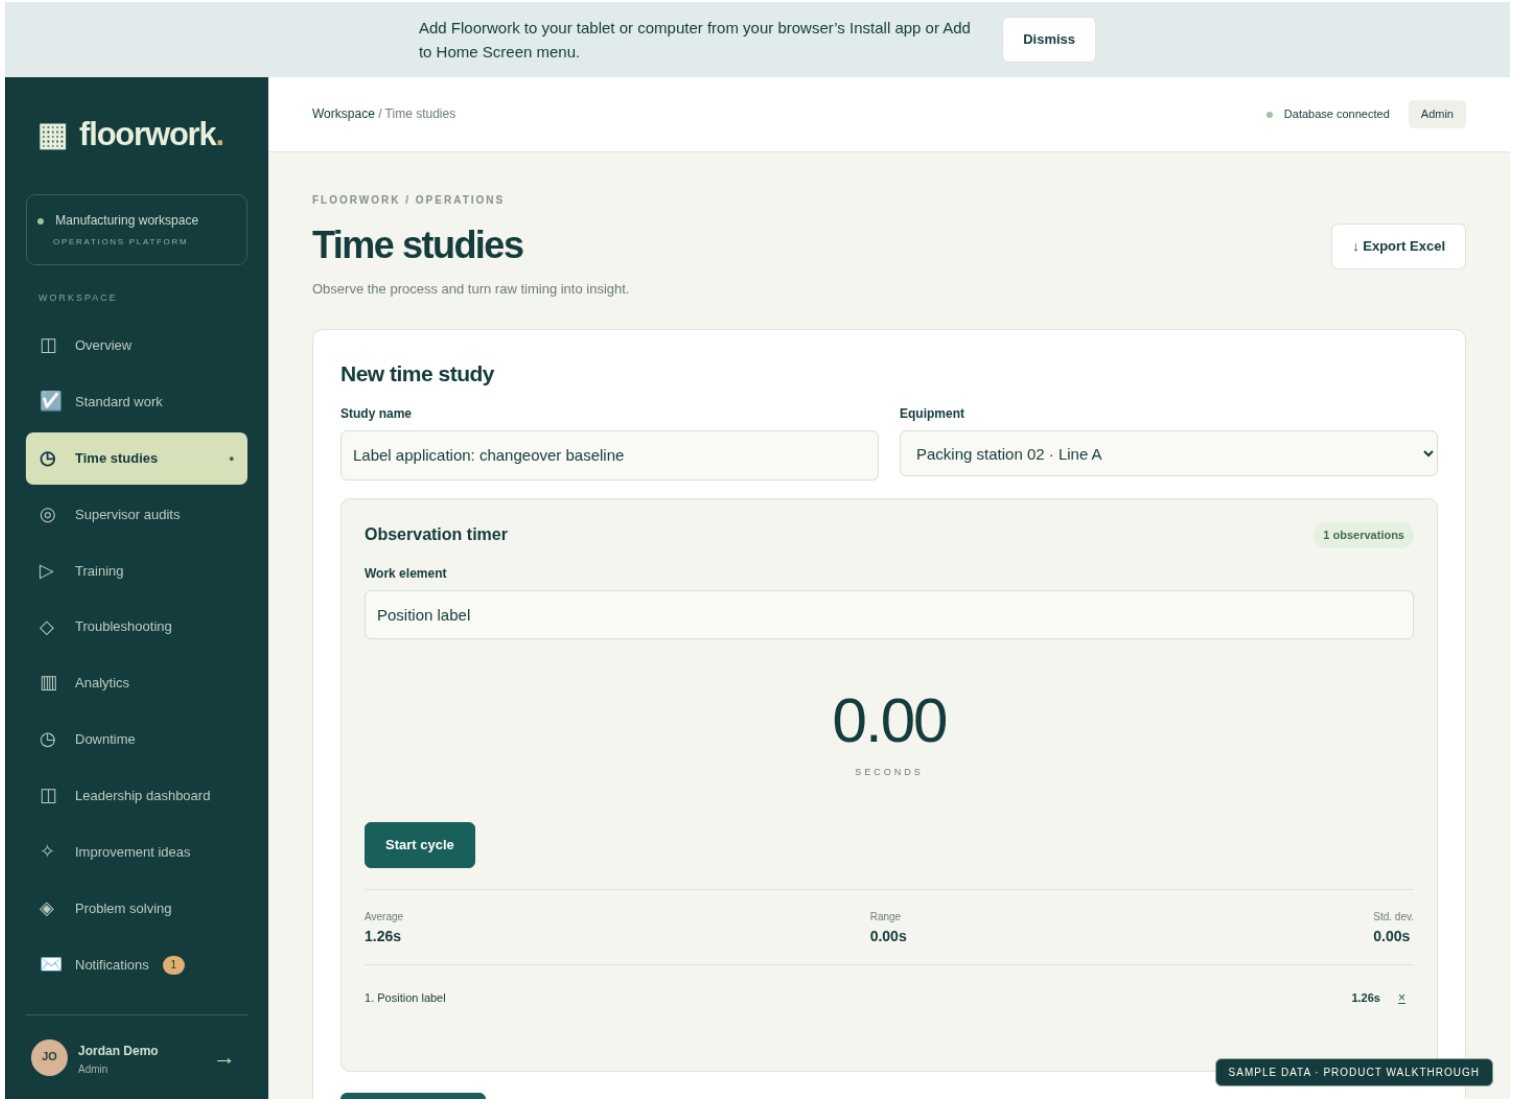

Full forms, histories and reports are in the full-size PNGs and HTML gallery. · 04-work-history

FLOORWORK / SAMPLE DATA

Time studies: stopwatch and observations

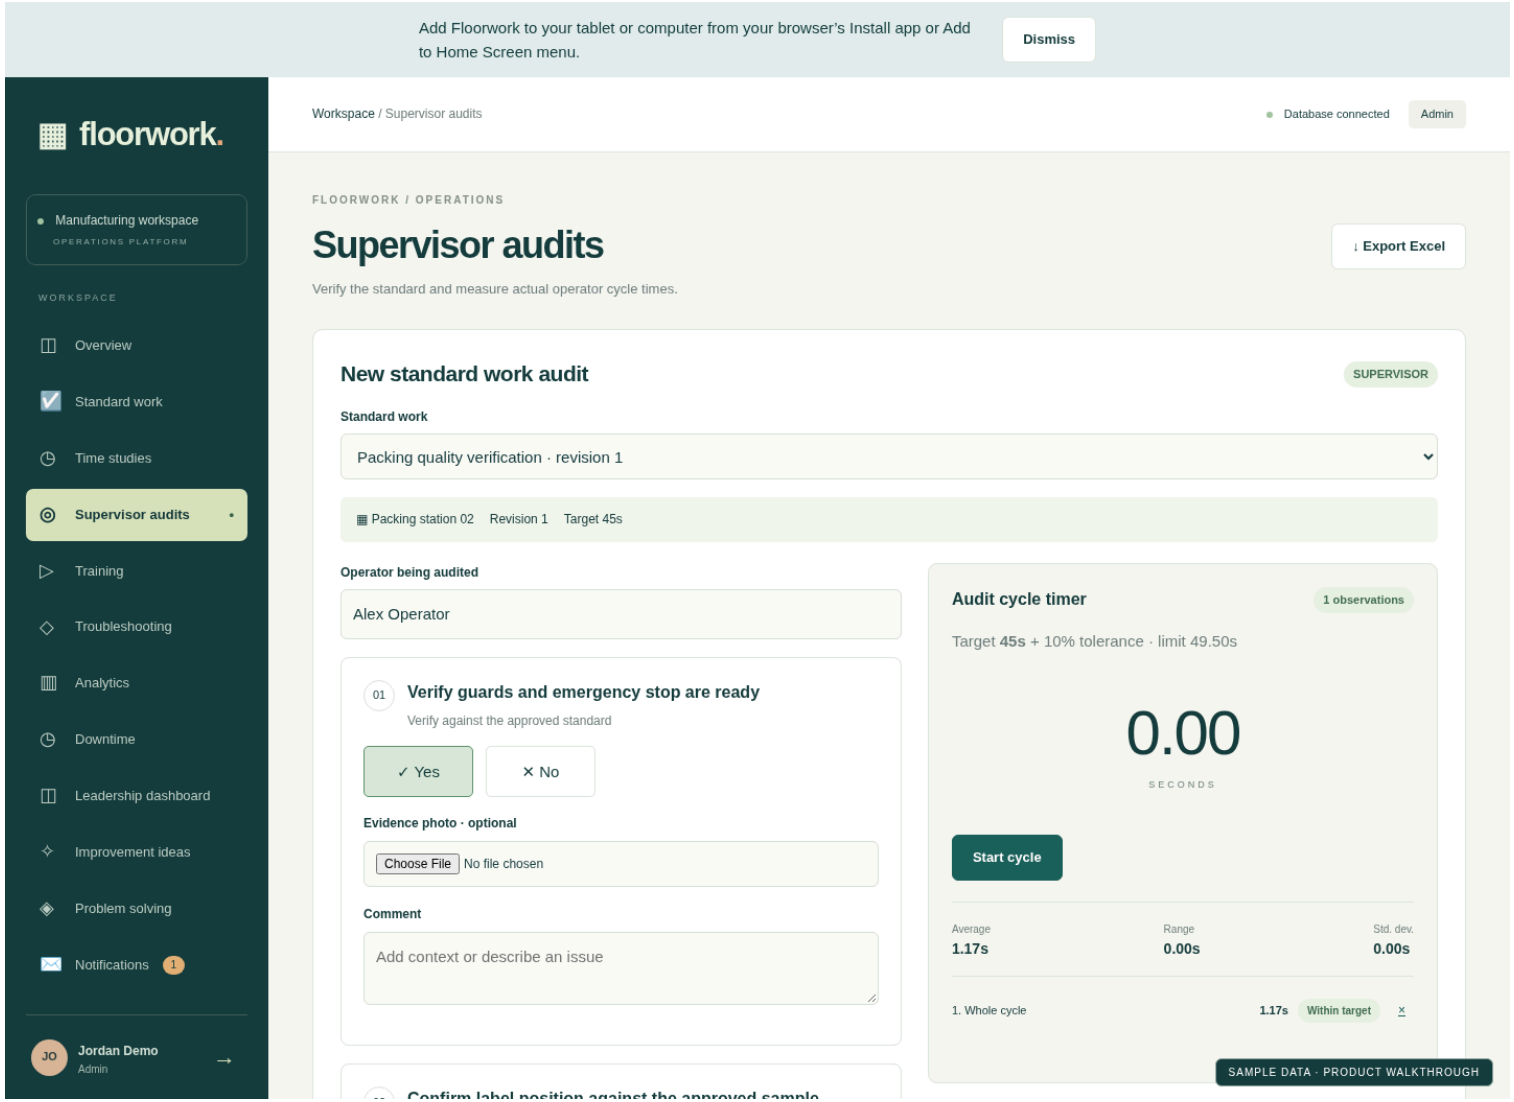

Name work elements, record repeated stopwatch observations, review statistics and save raw timings. The visible short observation is a demonstration.

Full forms, histories and reports are in the full-size PNGs and HTML gallery. · 05-time-study

Supervisor audits: checks and cycle timing

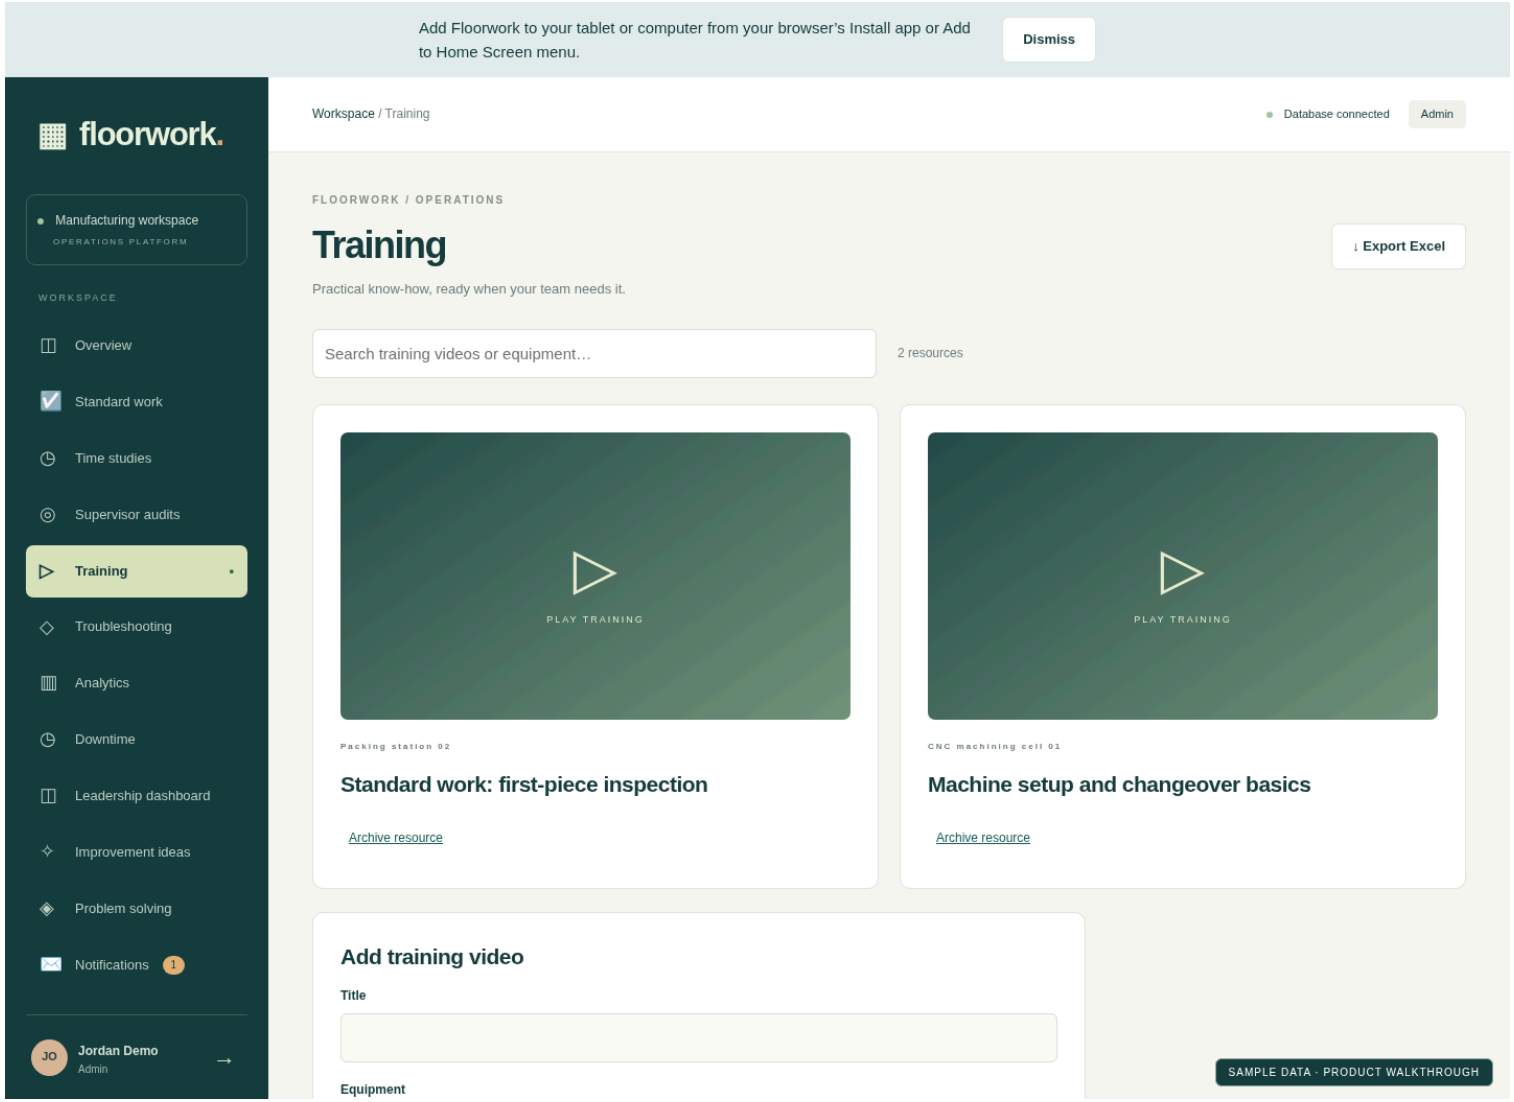

Identify the operator, verify the standard, collect evidence and compare actual cycles against target and tolerance.

Full forms, histories and reports are in the full-size PNGs and HTML gallery. · 06-supervisor-audit

Training library and video editor

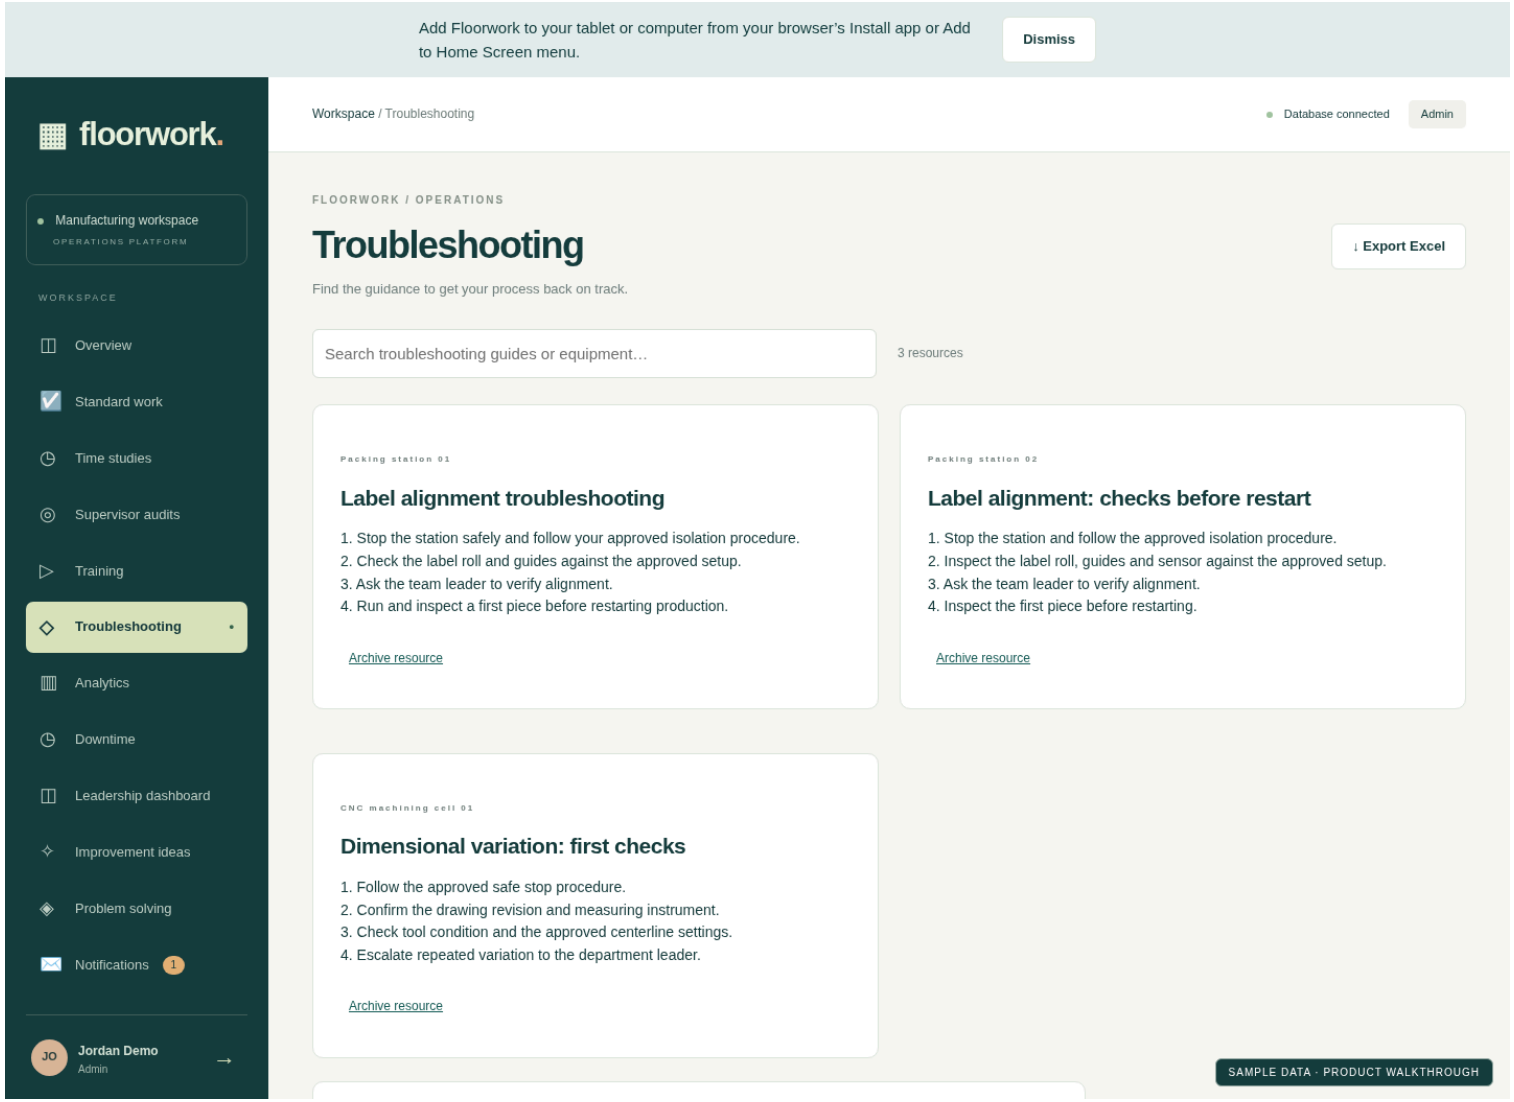

Search equipment-linked training, open linked YouTube/Vimeo playback and add resources. Live provider playback is not demonstrated.

Full forms, histories and reports are in the full-size PNGs and HTML gallery. · 07-training

Troubleshooting library

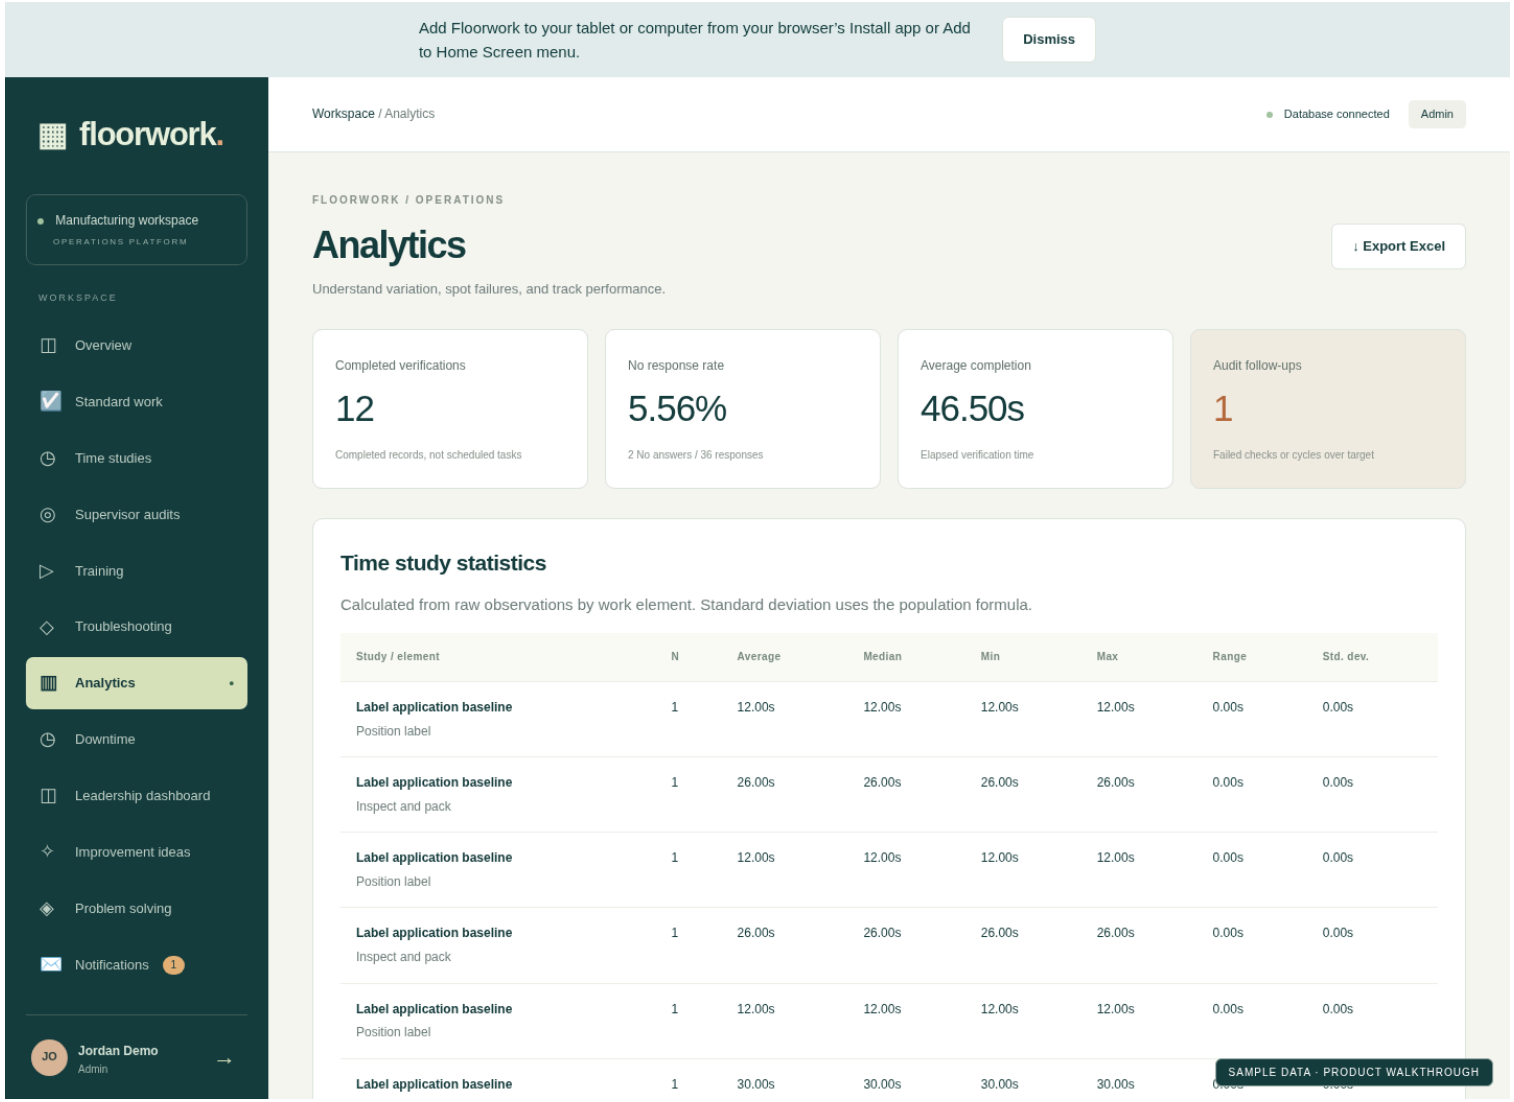

Search readable equipment-specific instructions and add or archive guides.

Full forms, histories and reports are in the full-size PNGs and HTML gallery. · 08-troubleshooting

Analytics and detailed statistics

Verification totals, No-answer rates, completion times, audit follow-ups, timing variation and detailed records.

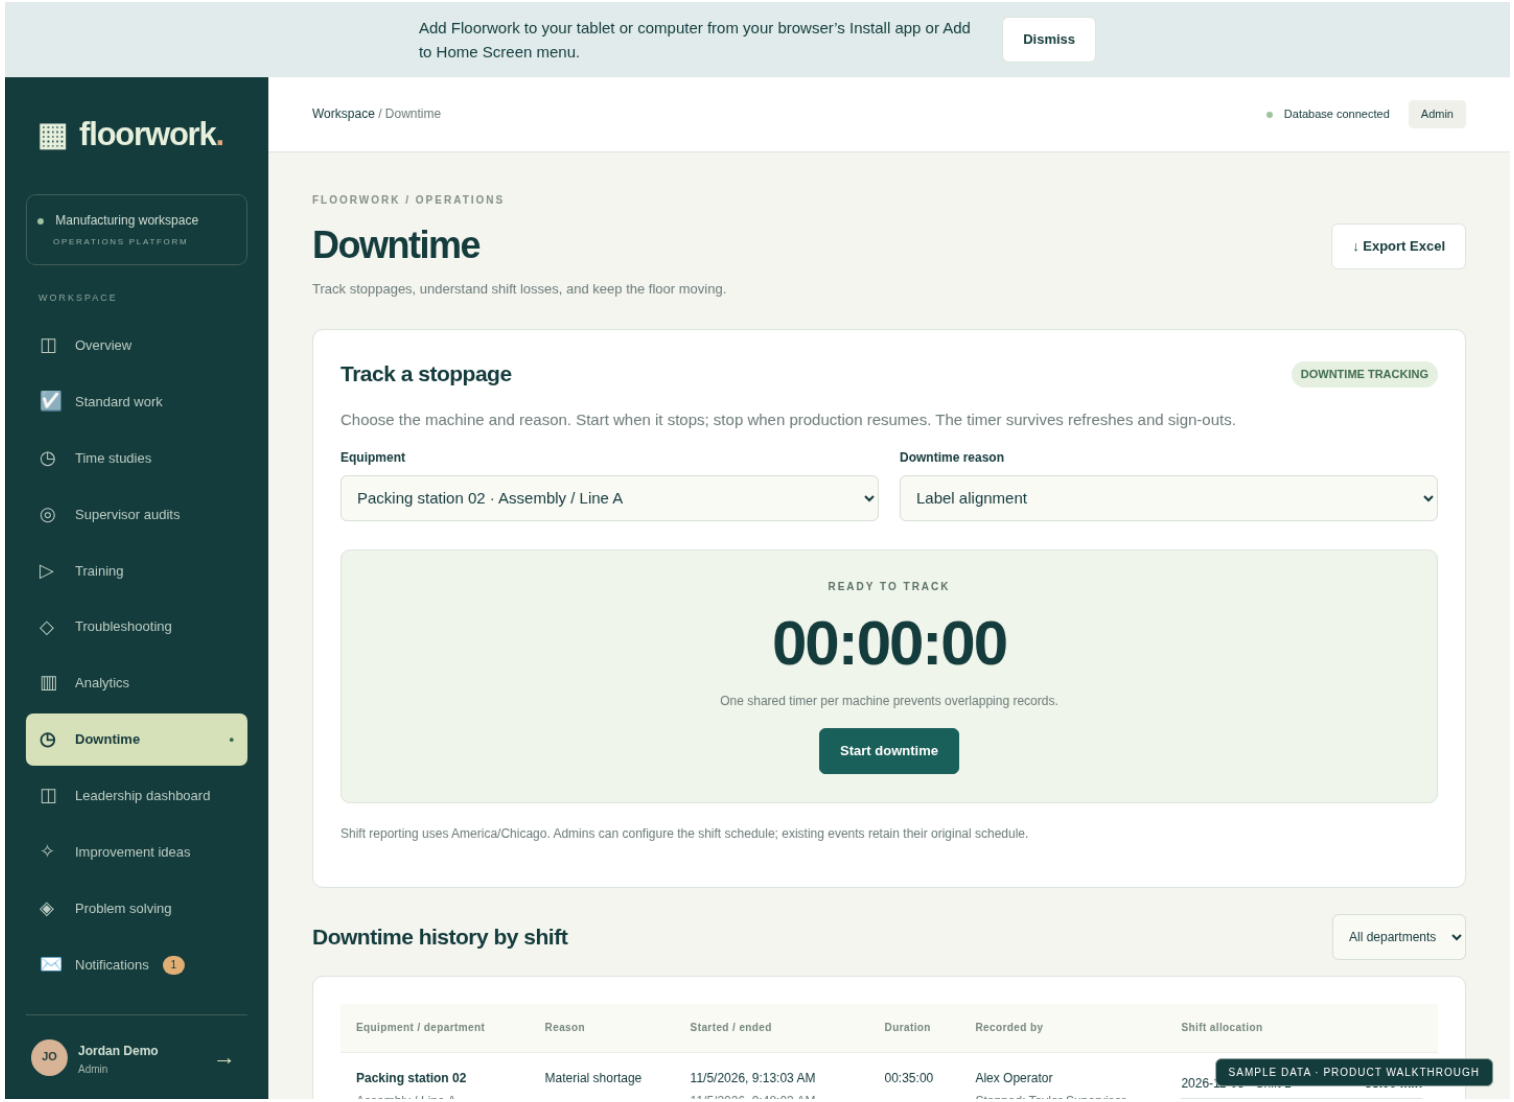

Full forms, histories and reports are in the full-size PNGs and HTML gallery. · 09-analytics

FLOORWORK / SAMPLE DATA

Downtime: ready to start

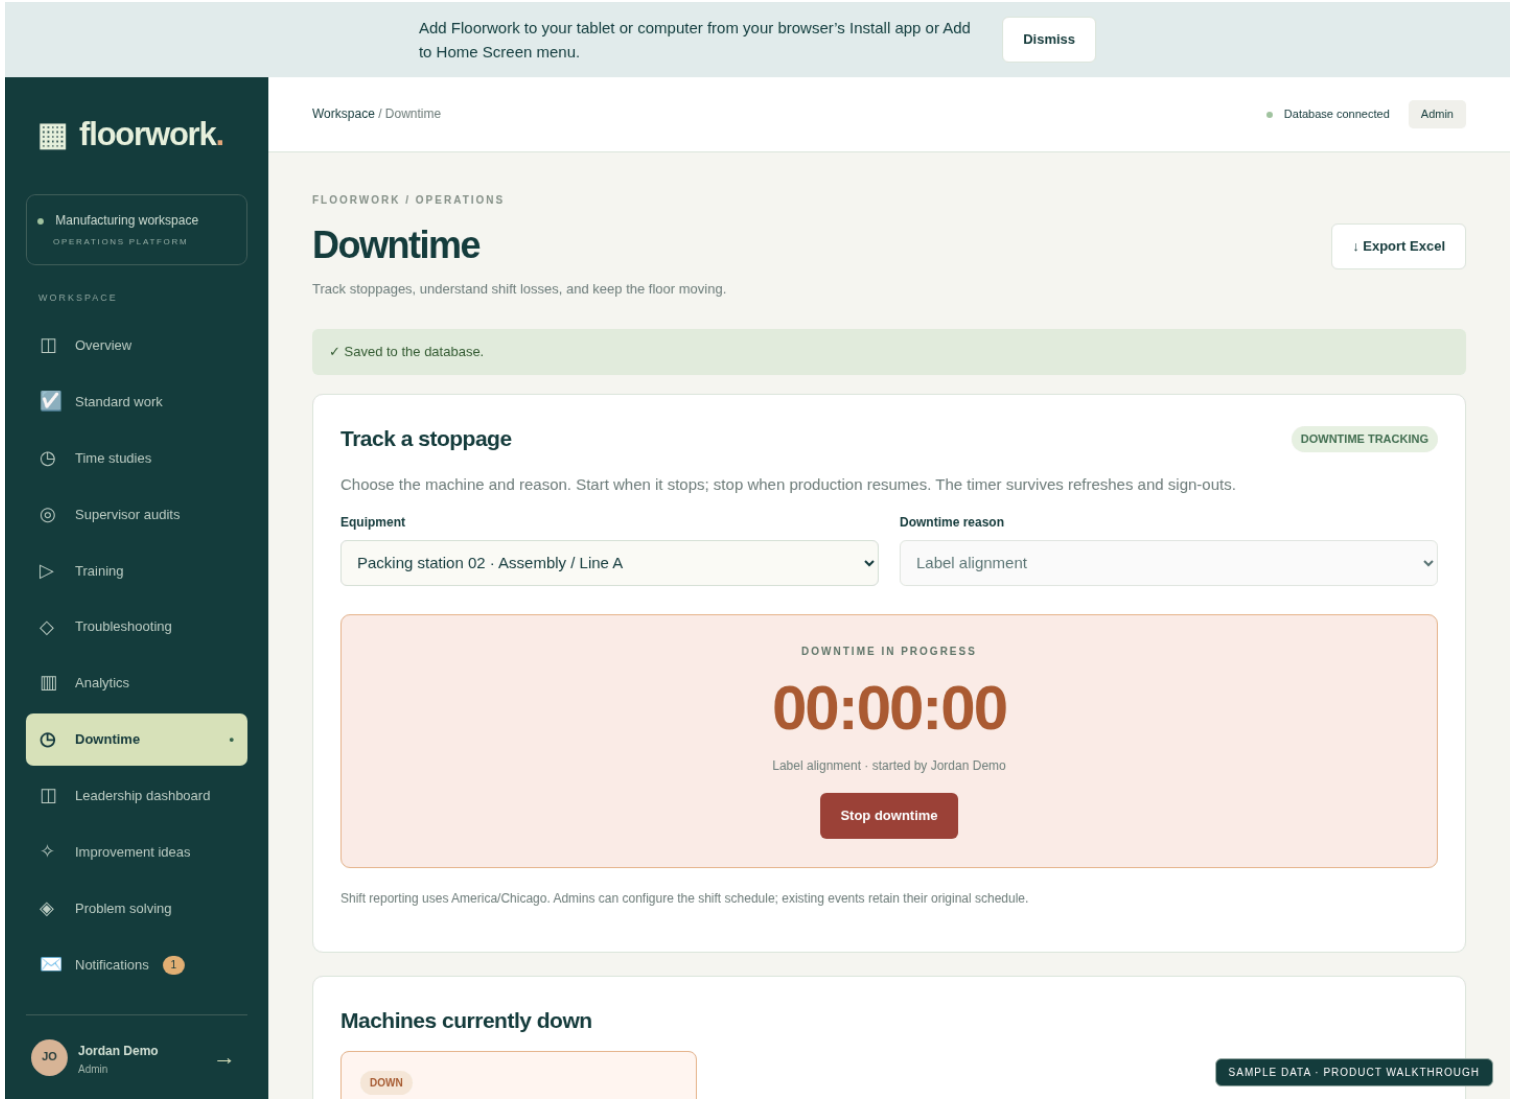

Choose the machine and reason. Admins also manage reasons, timer availability and shift schedules.

Full forms, histories and reports are in the full-size PNGs and HTML gallery. · 10-downtime-ready

Downtime: shared timer running

An actual started event is persisted by the server and survives reload. Stop the timer when production resumes.

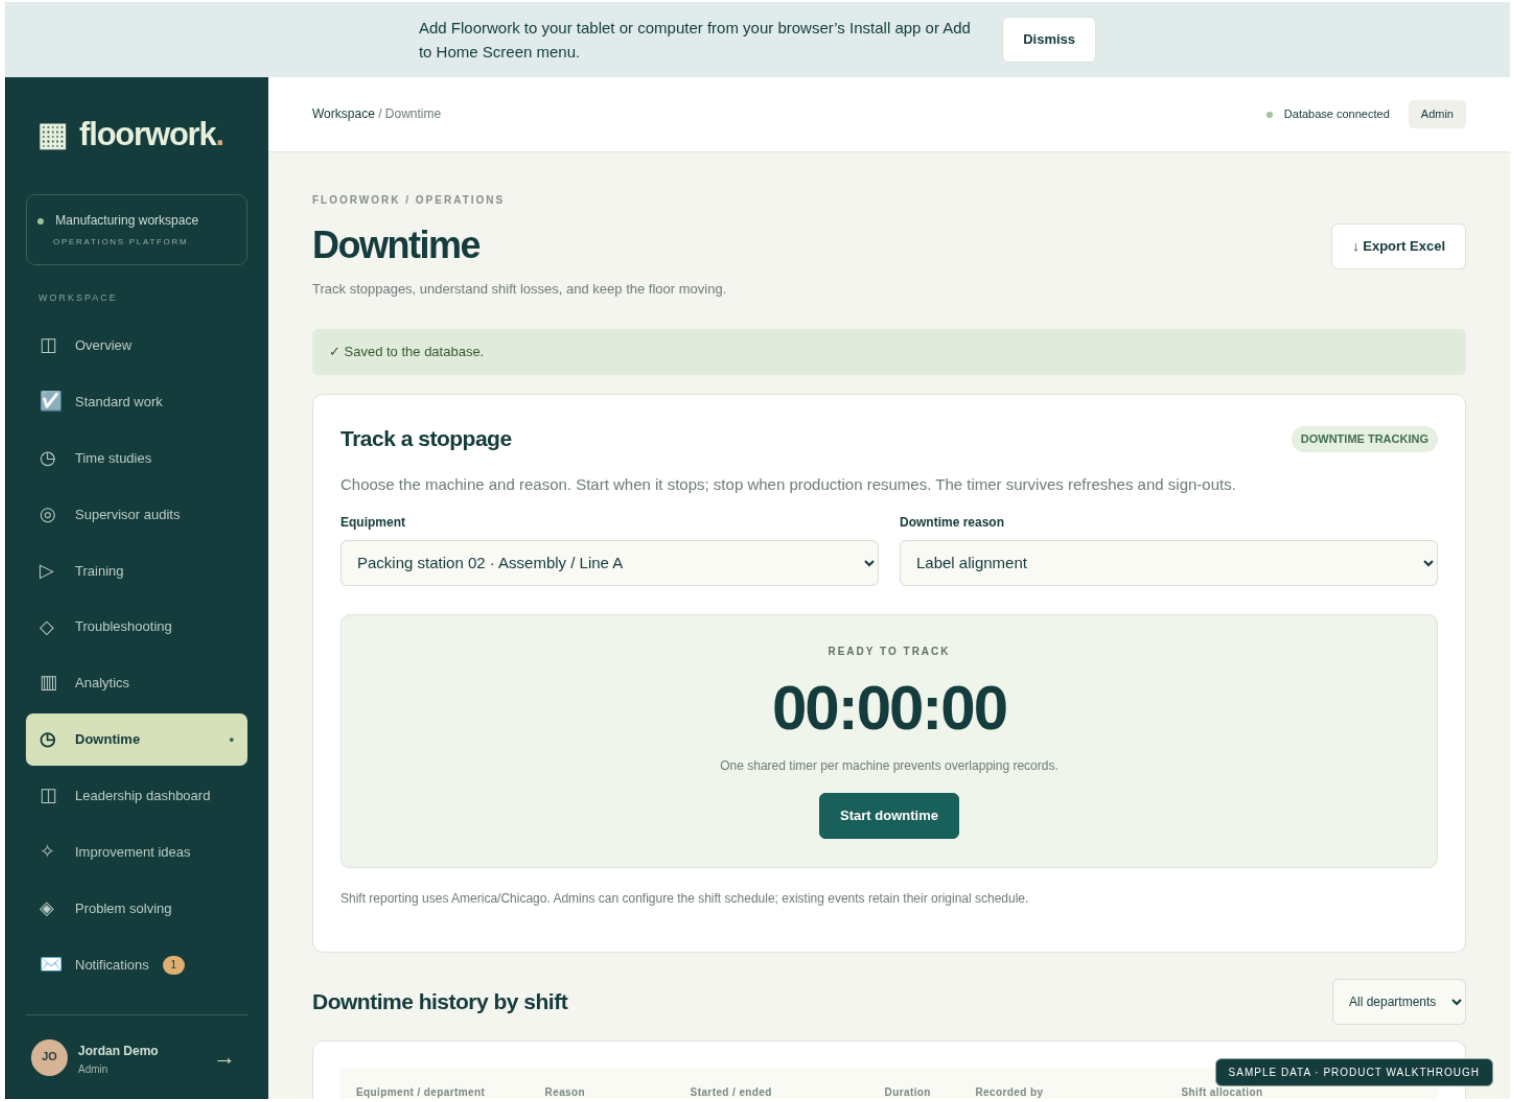

Full forms, histories and reports are in the full-size PNGs and HTML gallery. · 11-downtime-running

FLOORWORK / SAMPLE DATA

Downtime: stopped event and shift history

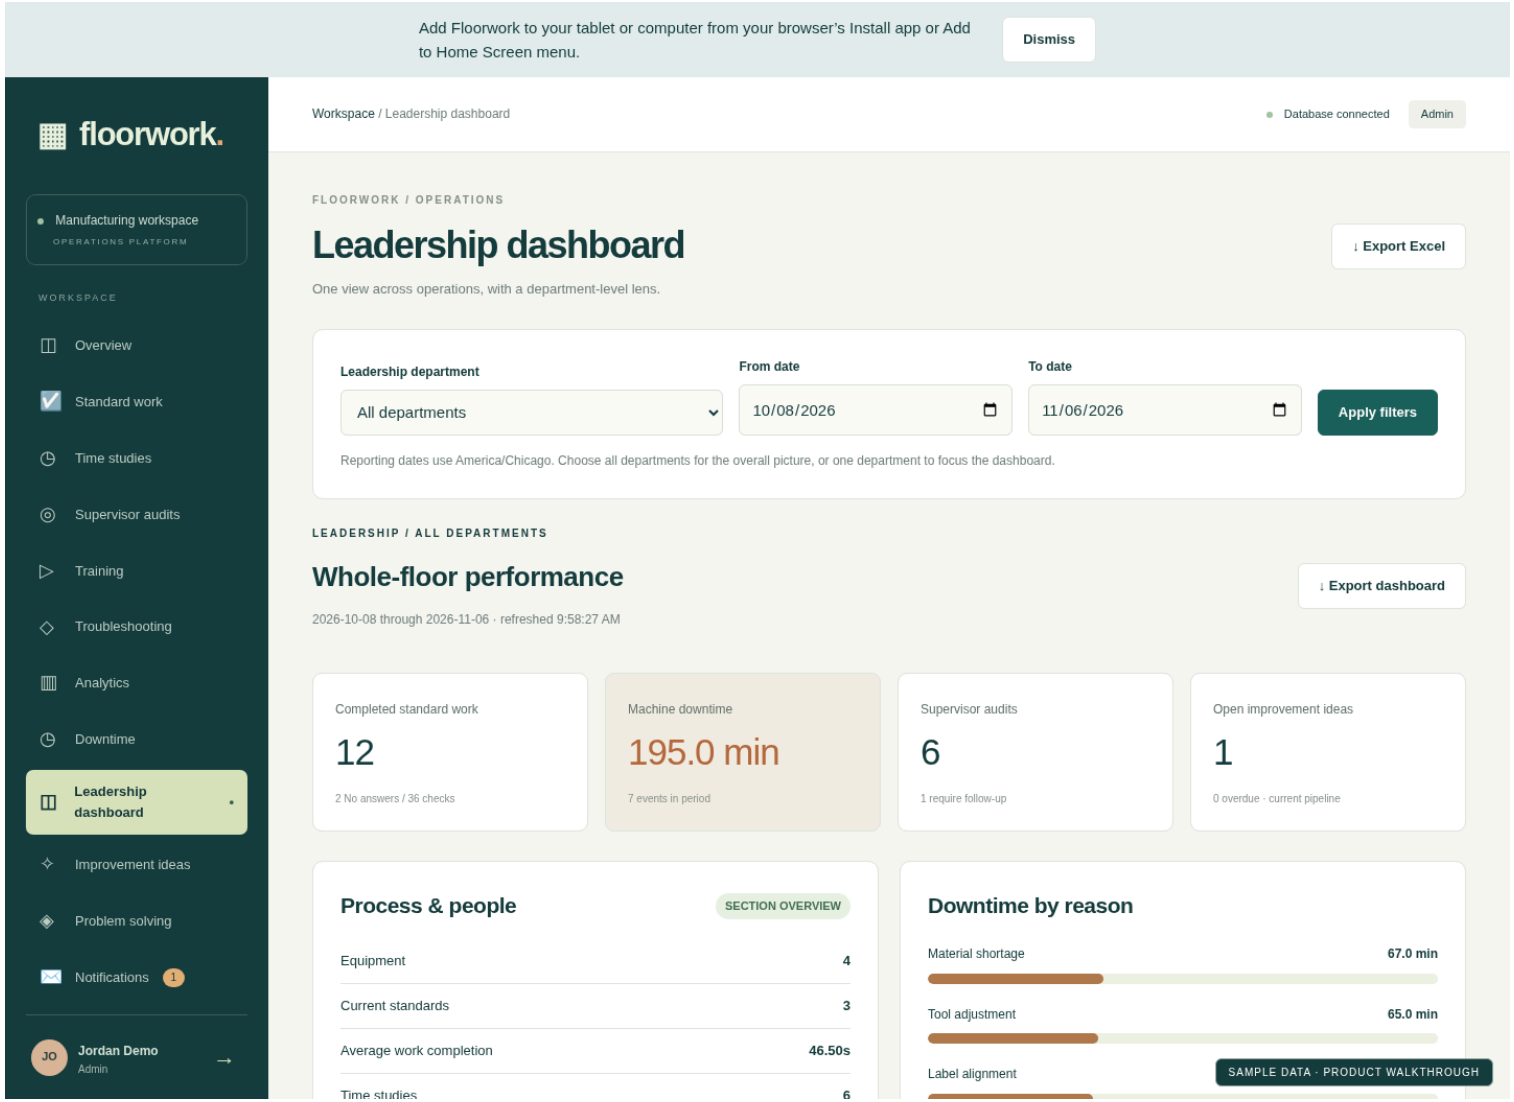

Stopped records retain their duration, reason, equipment, shift schedule and starter/stopper identities.

Full forms, histories and reports are in the full-size PNGs and HTML gallery. · 12-downtime-history

Leadership: overall performance

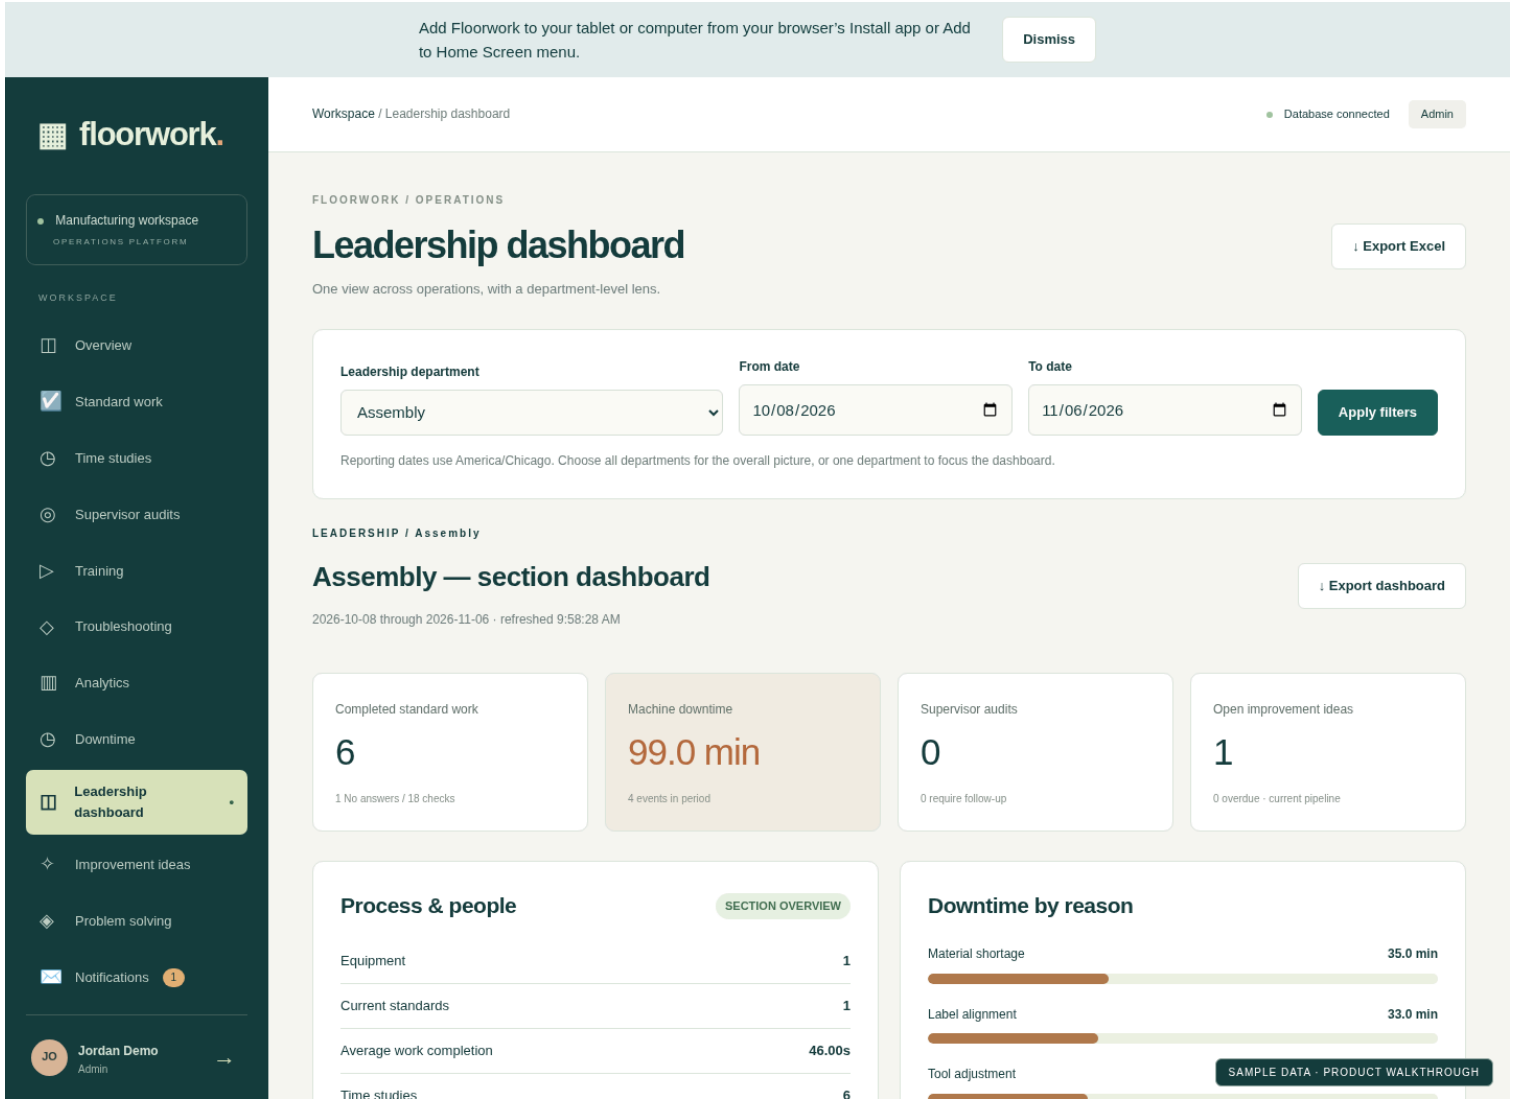

Complete date-filtered reporting across work, audits, studies, downtime, ideas, problem solving and current resource libraries.

Full forms, histories and reports are in the full-size PNGs and HTML gallery. · 13-leadership-overall

Leadership: department performance

The same dashboard scoped to Assembly, with department totals, downtime reasons, shift losses and an Excel export.

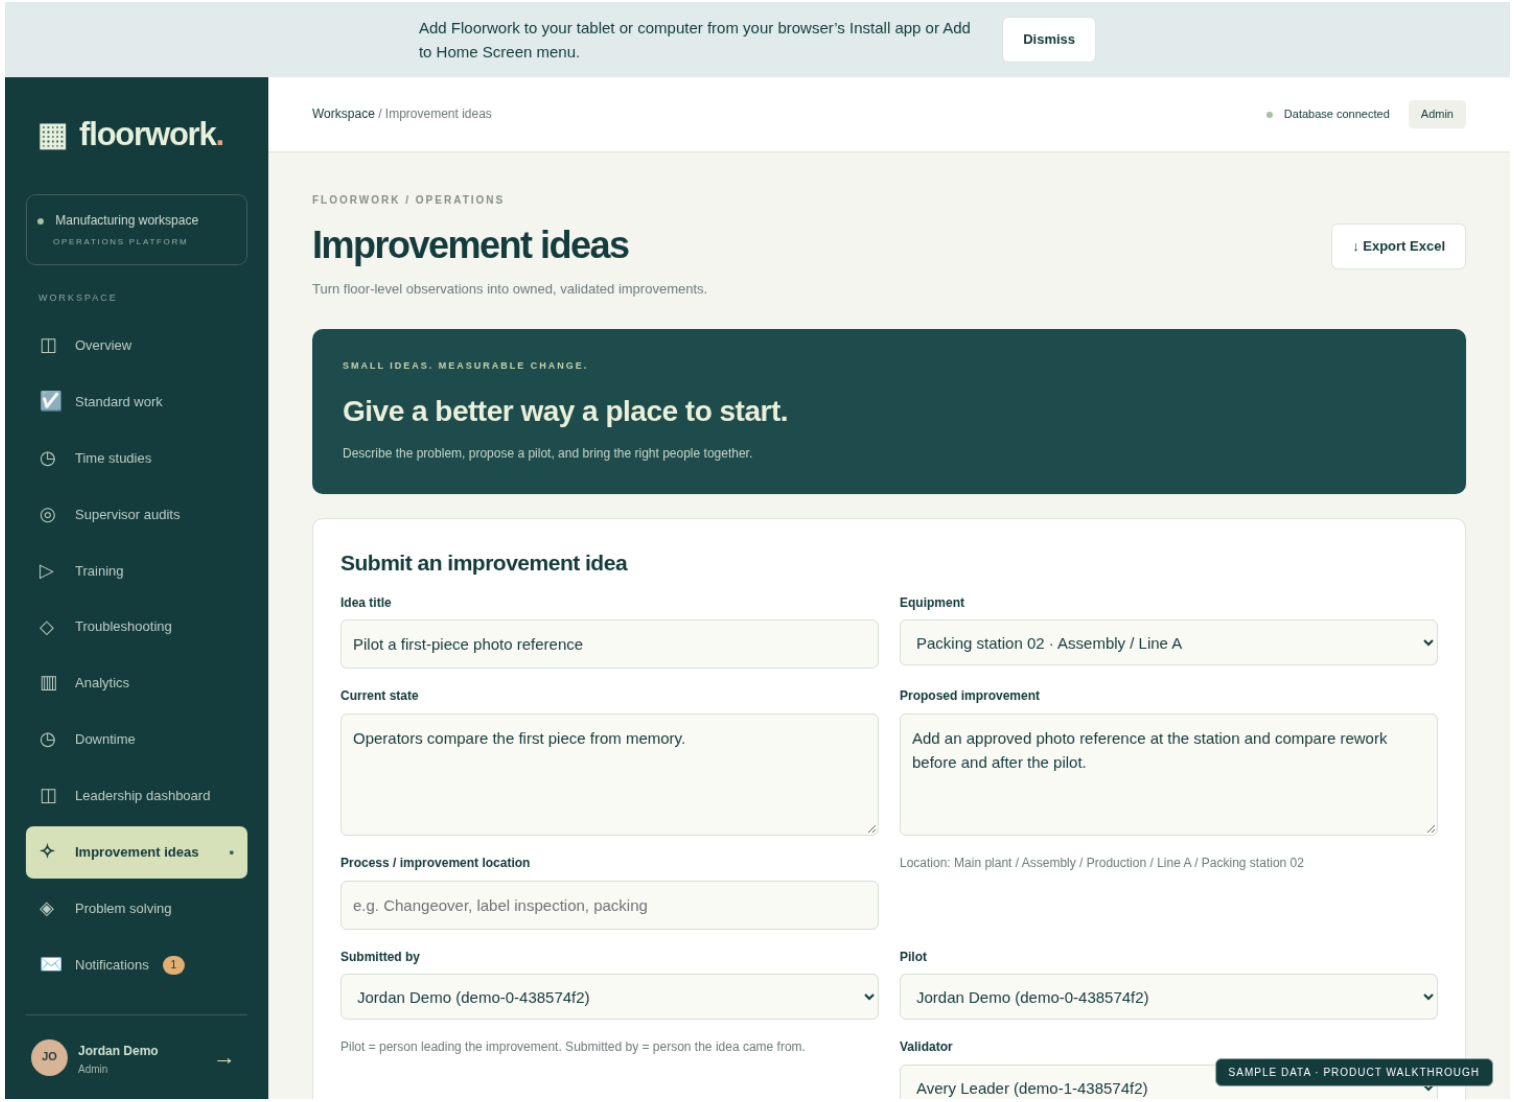

Full forms, histories and reports are in the full-size PNGs and HTML gallery. · 14-leadership-department

FLOORWORK / SAMPLE DATA

Improvement ideas: submit and follow progress

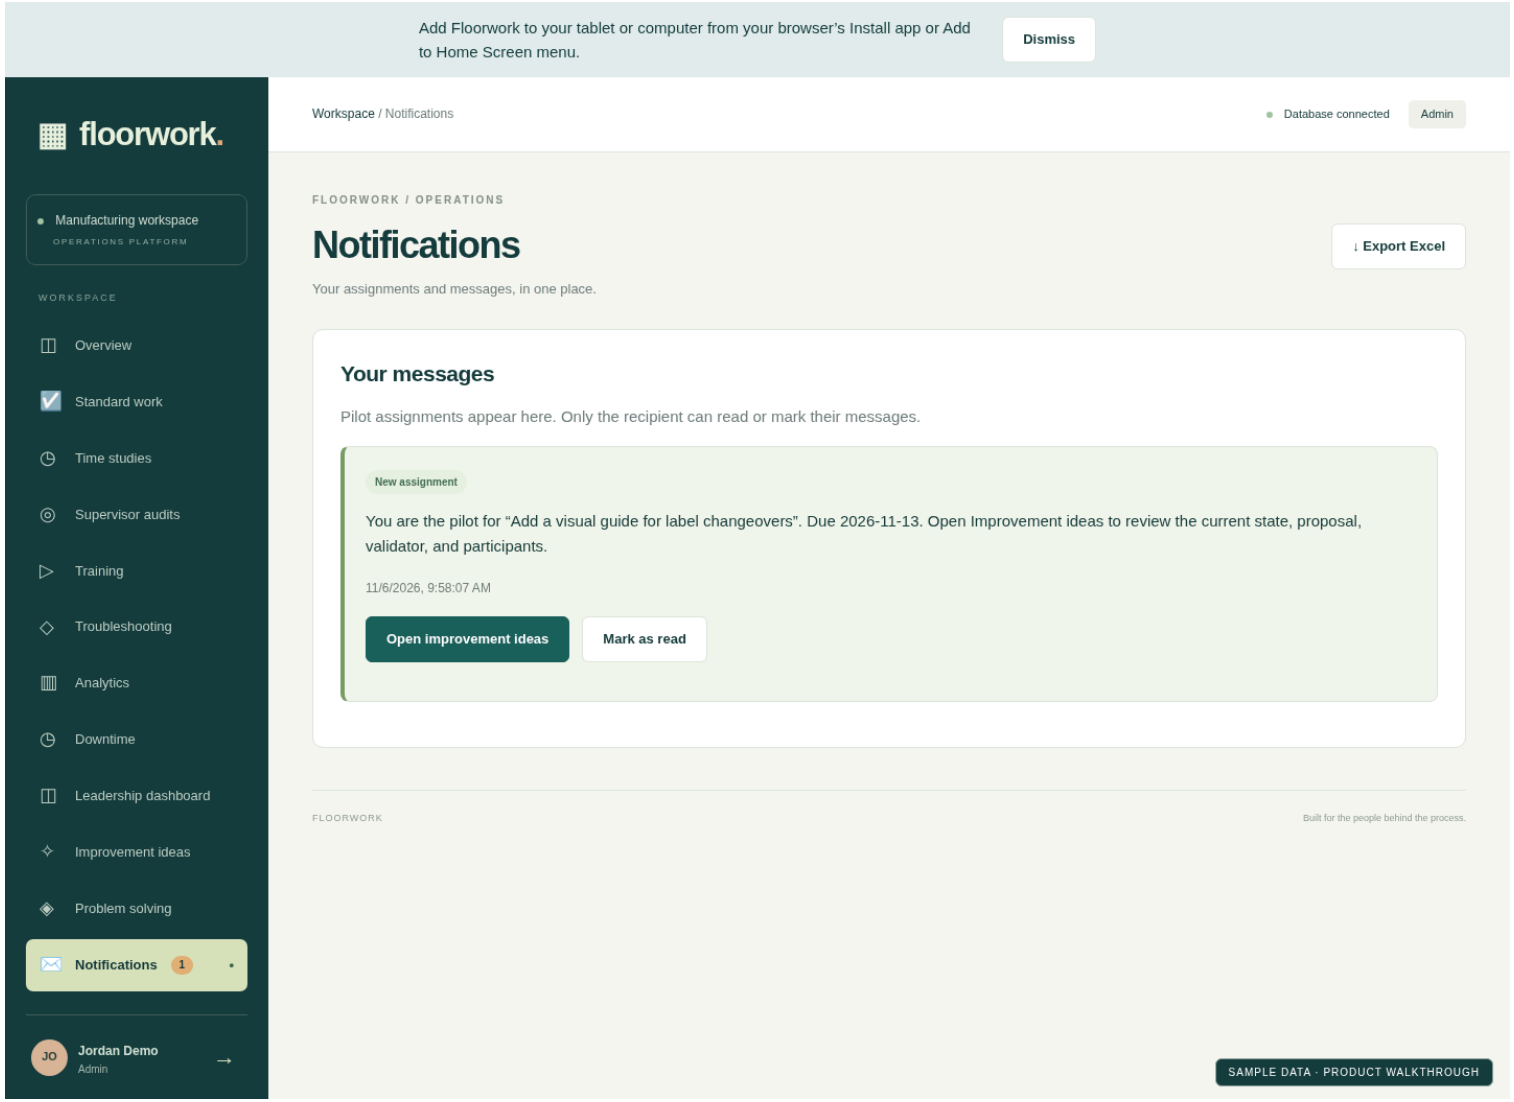

Assign submitter, pilot, validator and participants; describe current/proposed states, location and due date. Existing ideas appear in the pipeline below.

Full forms, histories and reports are in the full-size PNGs and HTML gallery. · 15-improvement-ideas

Pilot notifications

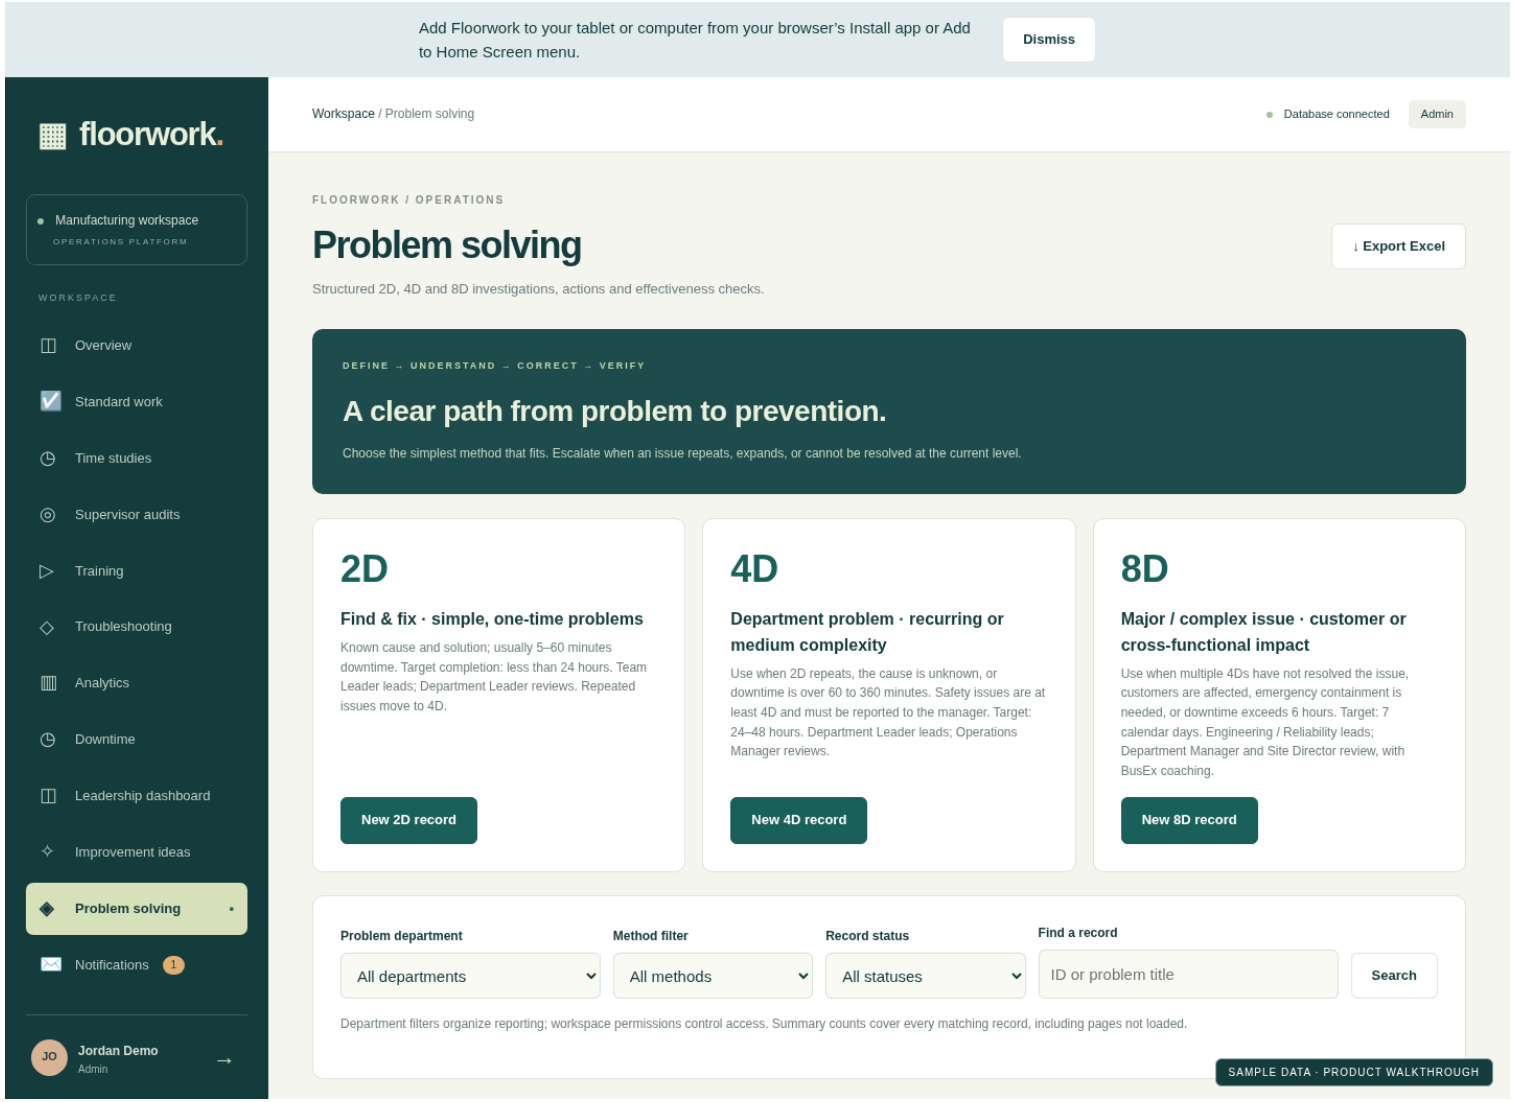

A real in-app assignment generated when the sample idea was created. Open the idea or mark the private message as read.

Full forms, histories and reports are in the full-size PNGs and HTML gallery. · 16-notifications

Problem solving: methodology and record dashboard

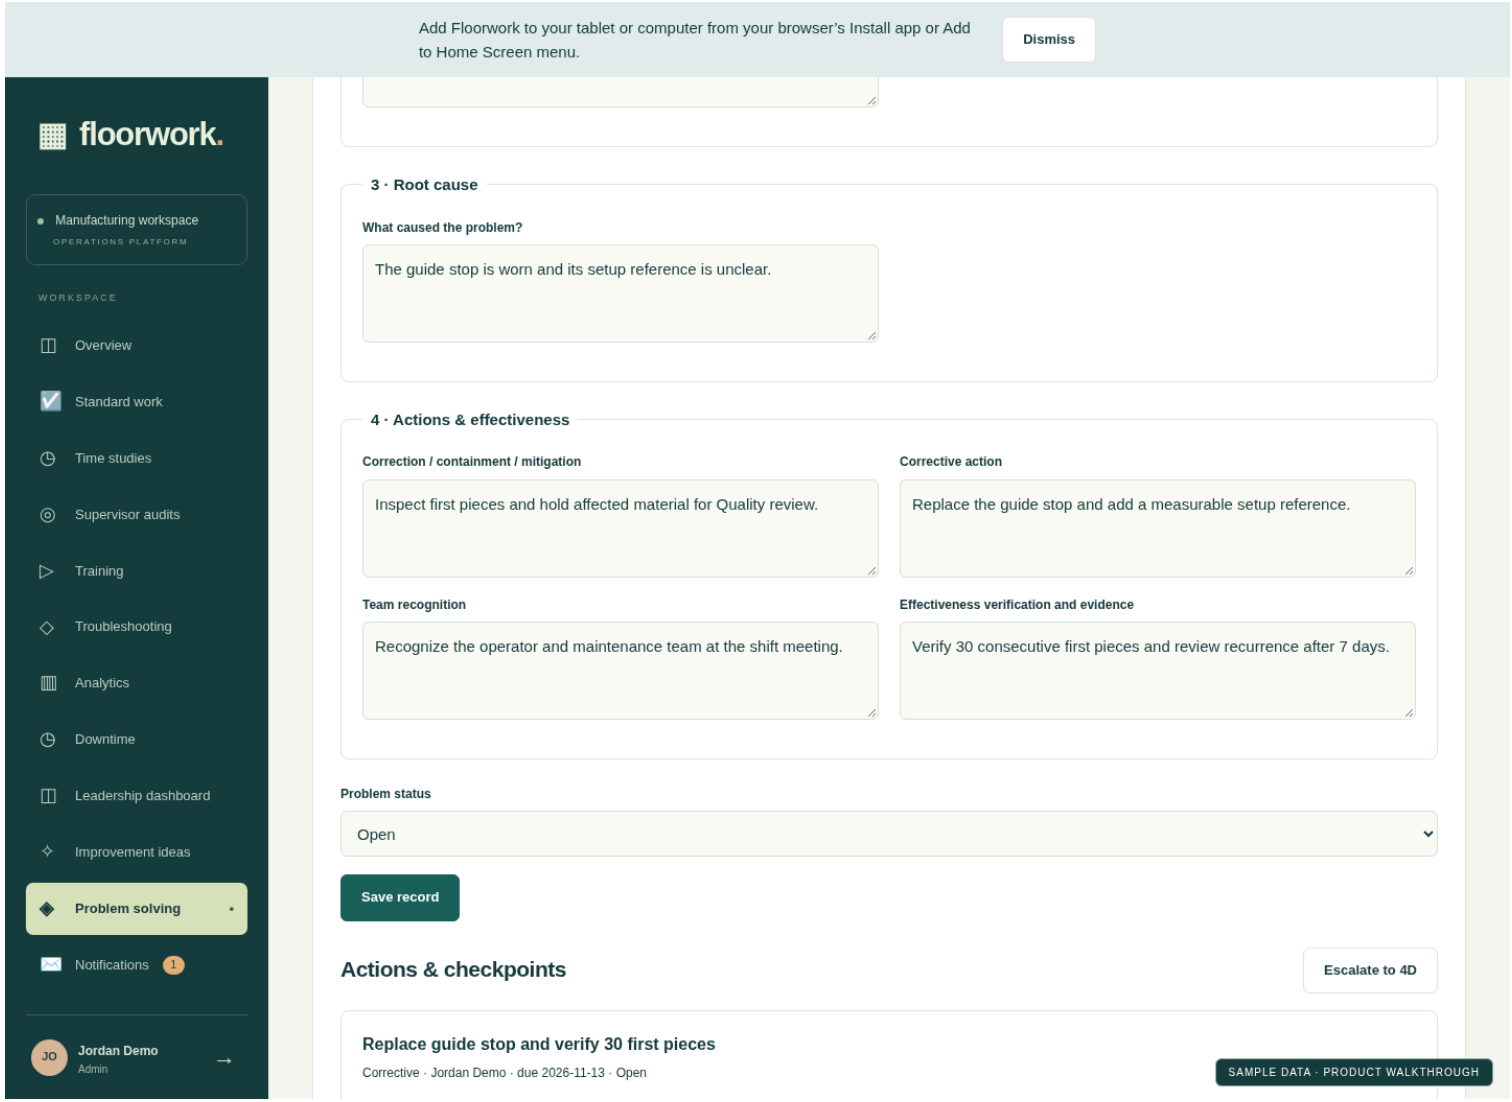

Workbook-based 2D / 4D / 8D selection guidance, department filters, open/closed counts, action totals, overdue follow-ups and the record viewer. Exact Microsoft Forms layouts await accessible references.

Full forms, histories and reports are in the full-size PNGs and HTML gallery. · 17-problem-solving

2D problem-solving record

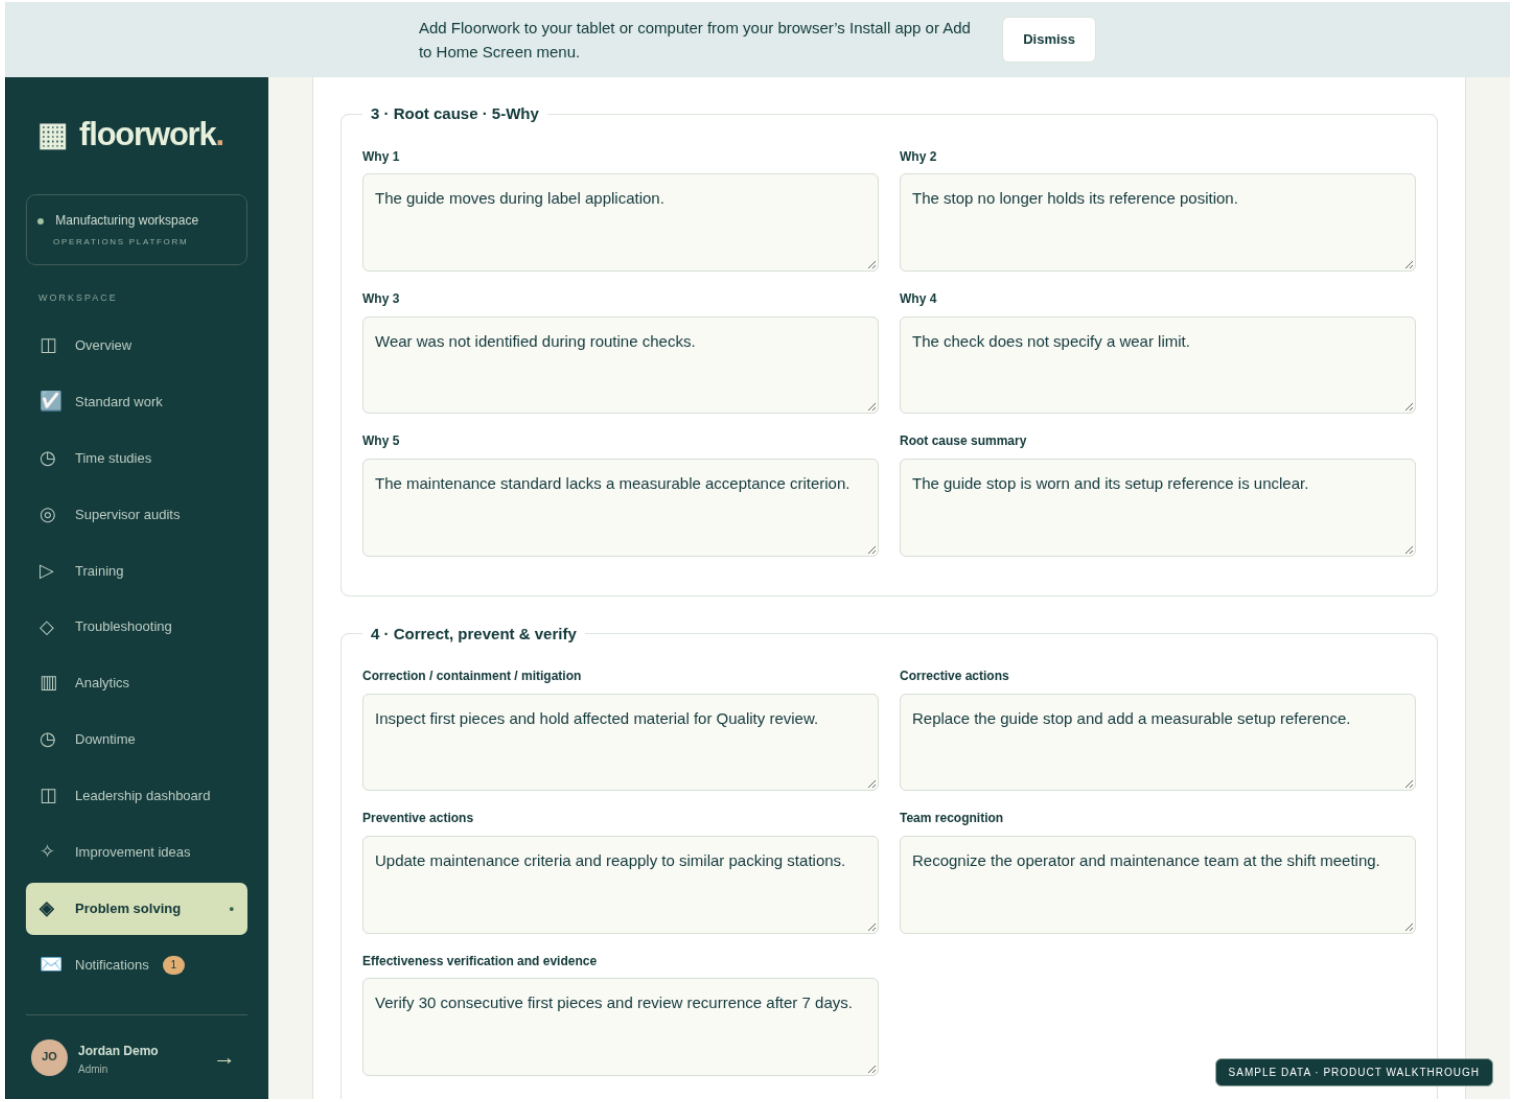

Find & fix · simple, one-time problems. Method-specific evidence fields, assigned facilitator/reviewer, due date, tracked actions and change history.

Full forms, histories and reports are in the full-size PNGs and HTML gallery. · 18-problem-2d

4D problem-solving record

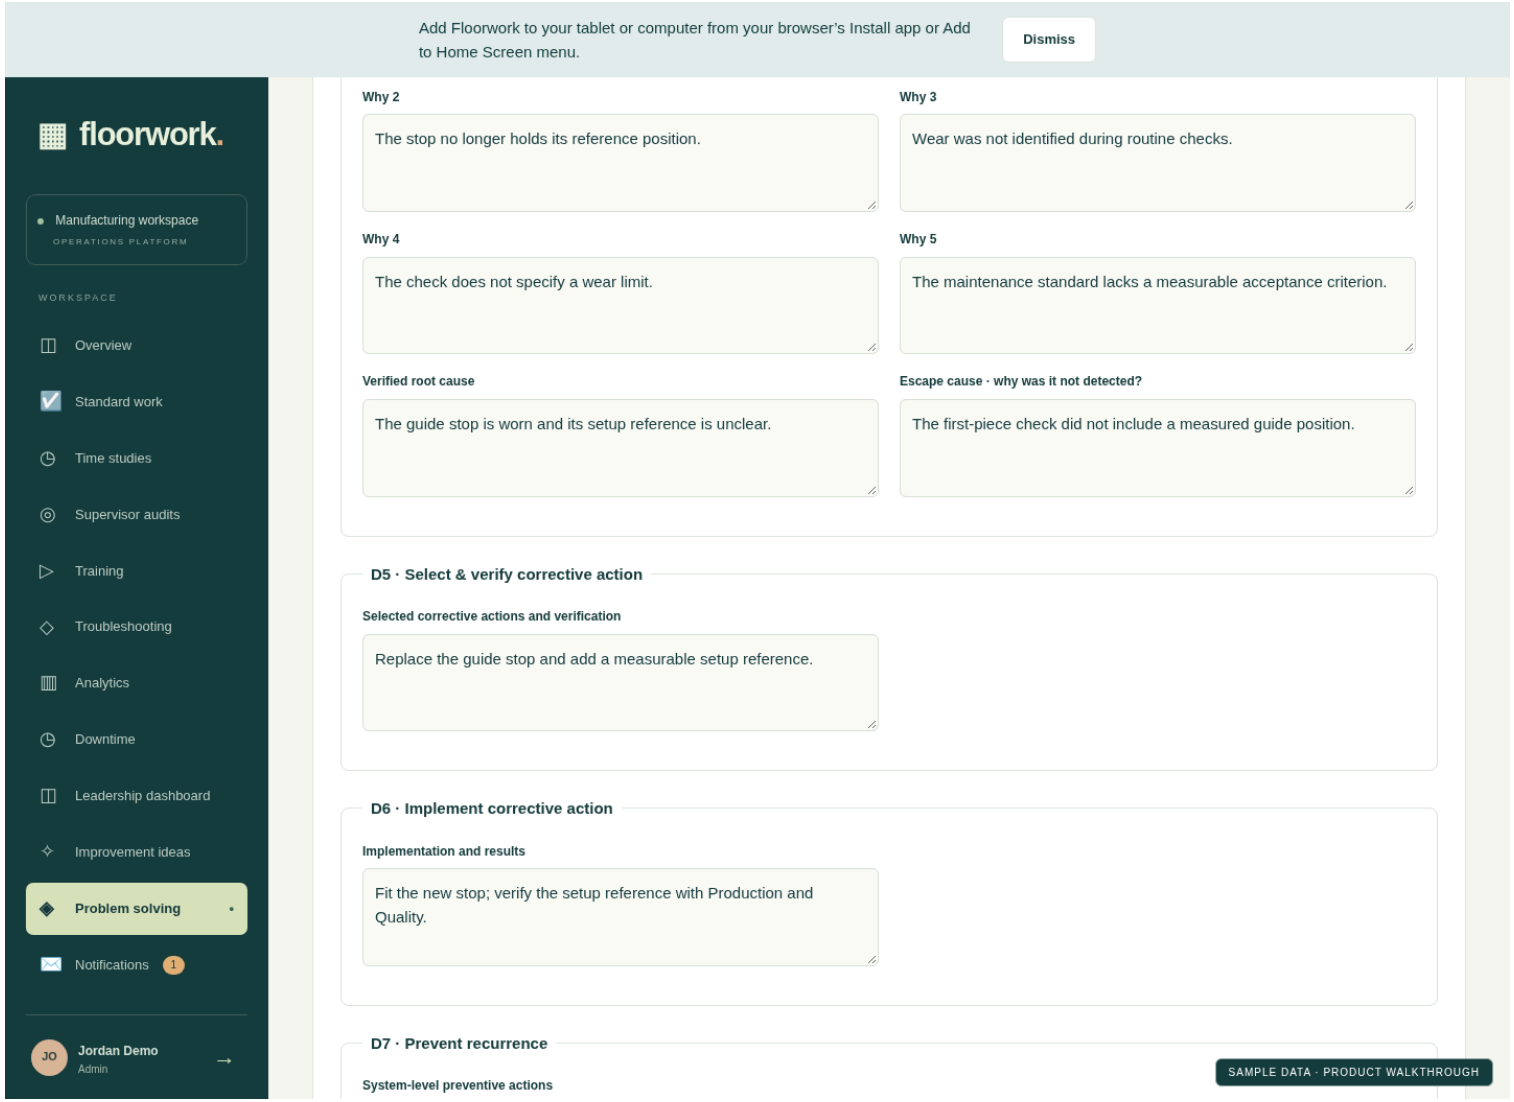

Department problem · recurring or medium complexity. Method-specific evidence fields, assigned facilitator/reviewer, due date, tracked actions and change history.

Full forms, histories and reports are in the full-size PNGs and HTML gallery. · 19-problem-4d

8D problem-solving record

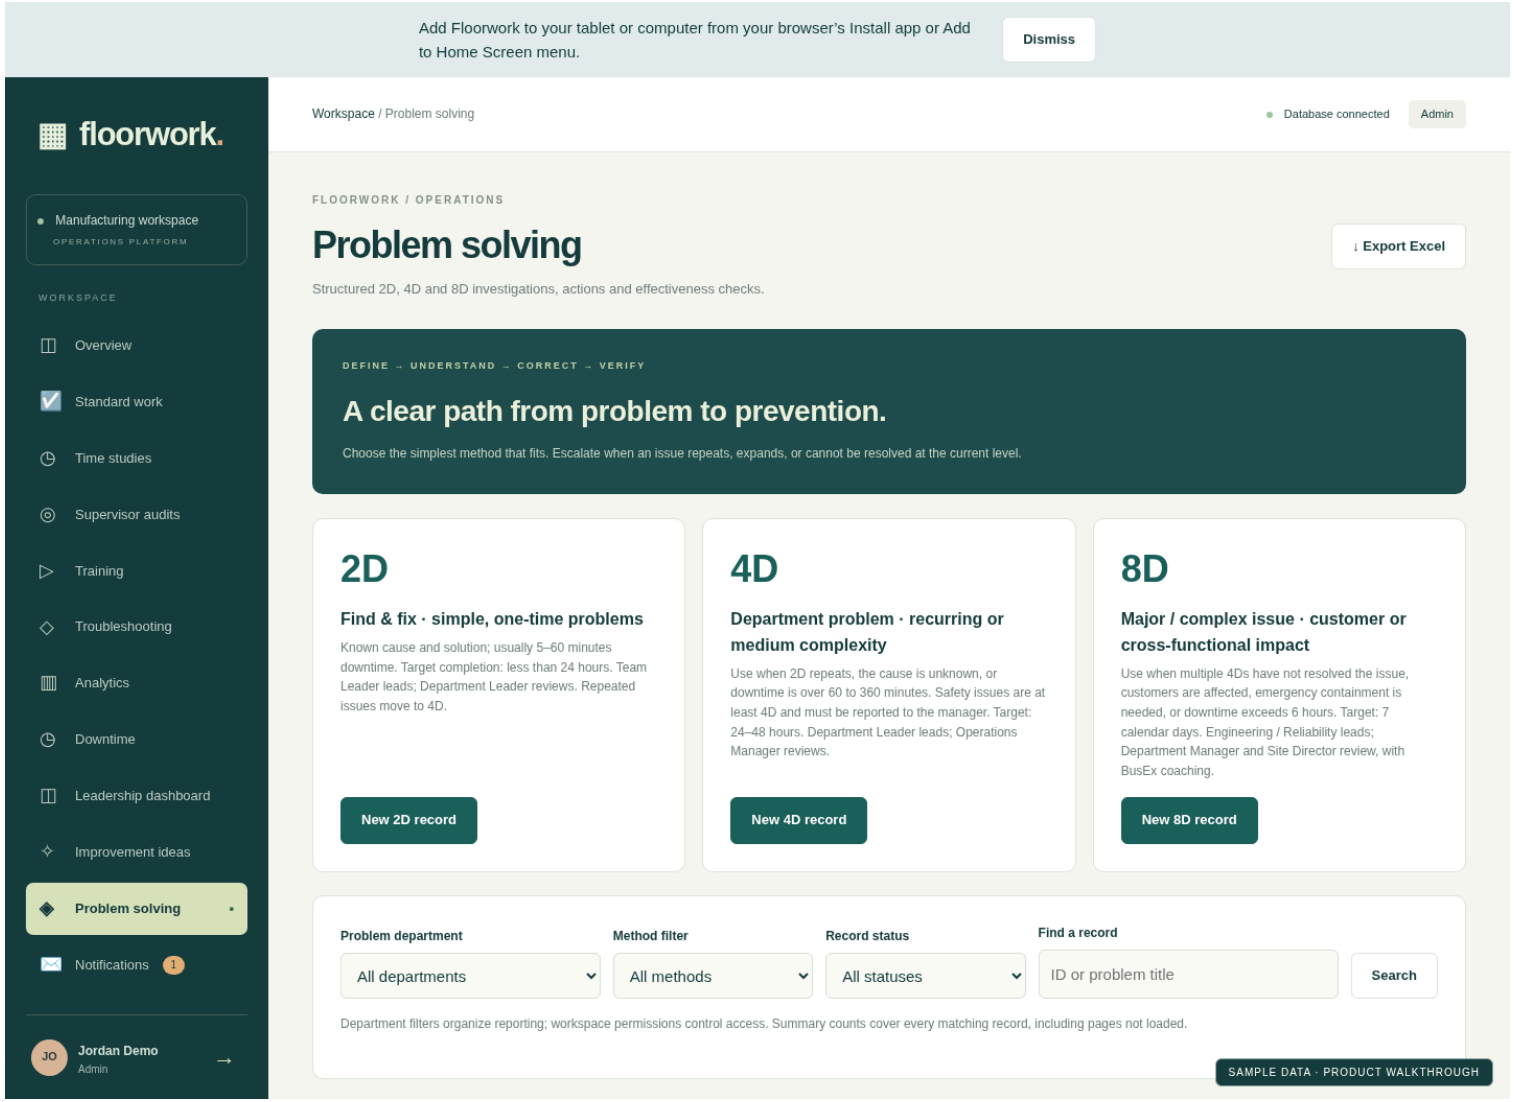

Major / complex issue · customer or cross-functional impact. Method-specific evidence fields, assigned facilitator/reviewer, due date, tracked actions and change history.

Full forms, histories and reports are in the full-size PNGs and HTML gallery. · 20-problem-8d

Problem solving: action update portal

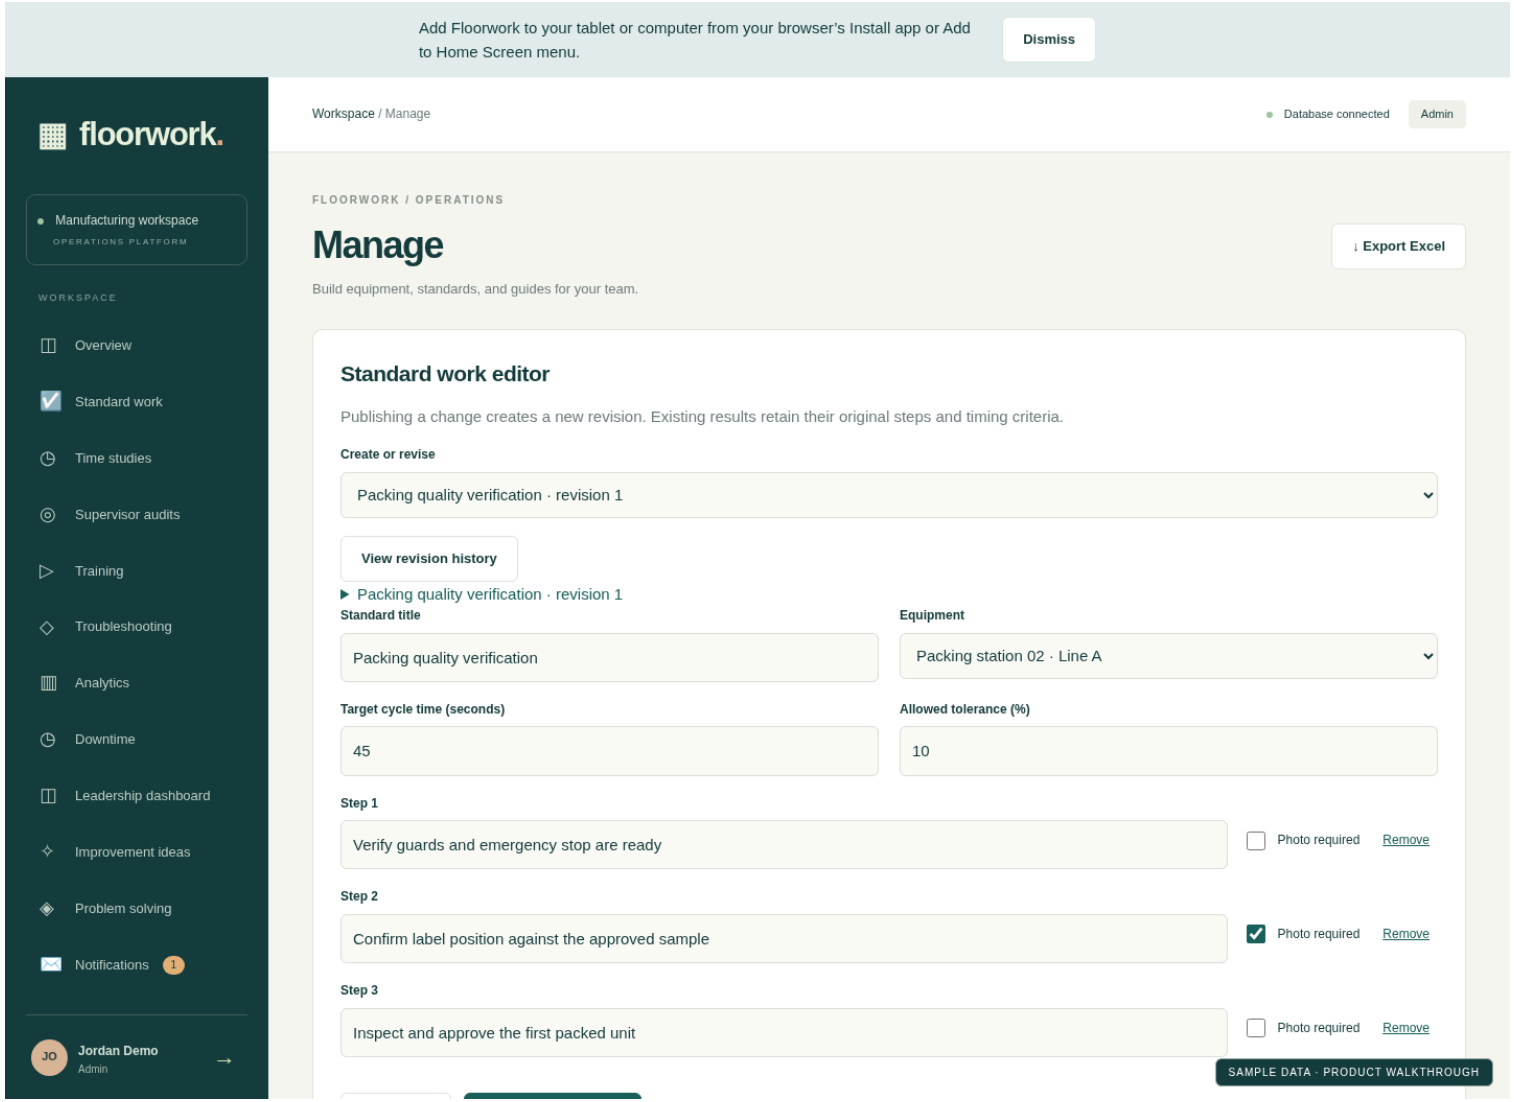

One follow-up queue for open corrective actions and checkpoints. Authorized owners/managers submit status and evidence comments; completed items remain in record history.

Full forms, histories and reports are in the full-size PNGs and HTML gallery. · 21-action-portal

Equipment and standard management

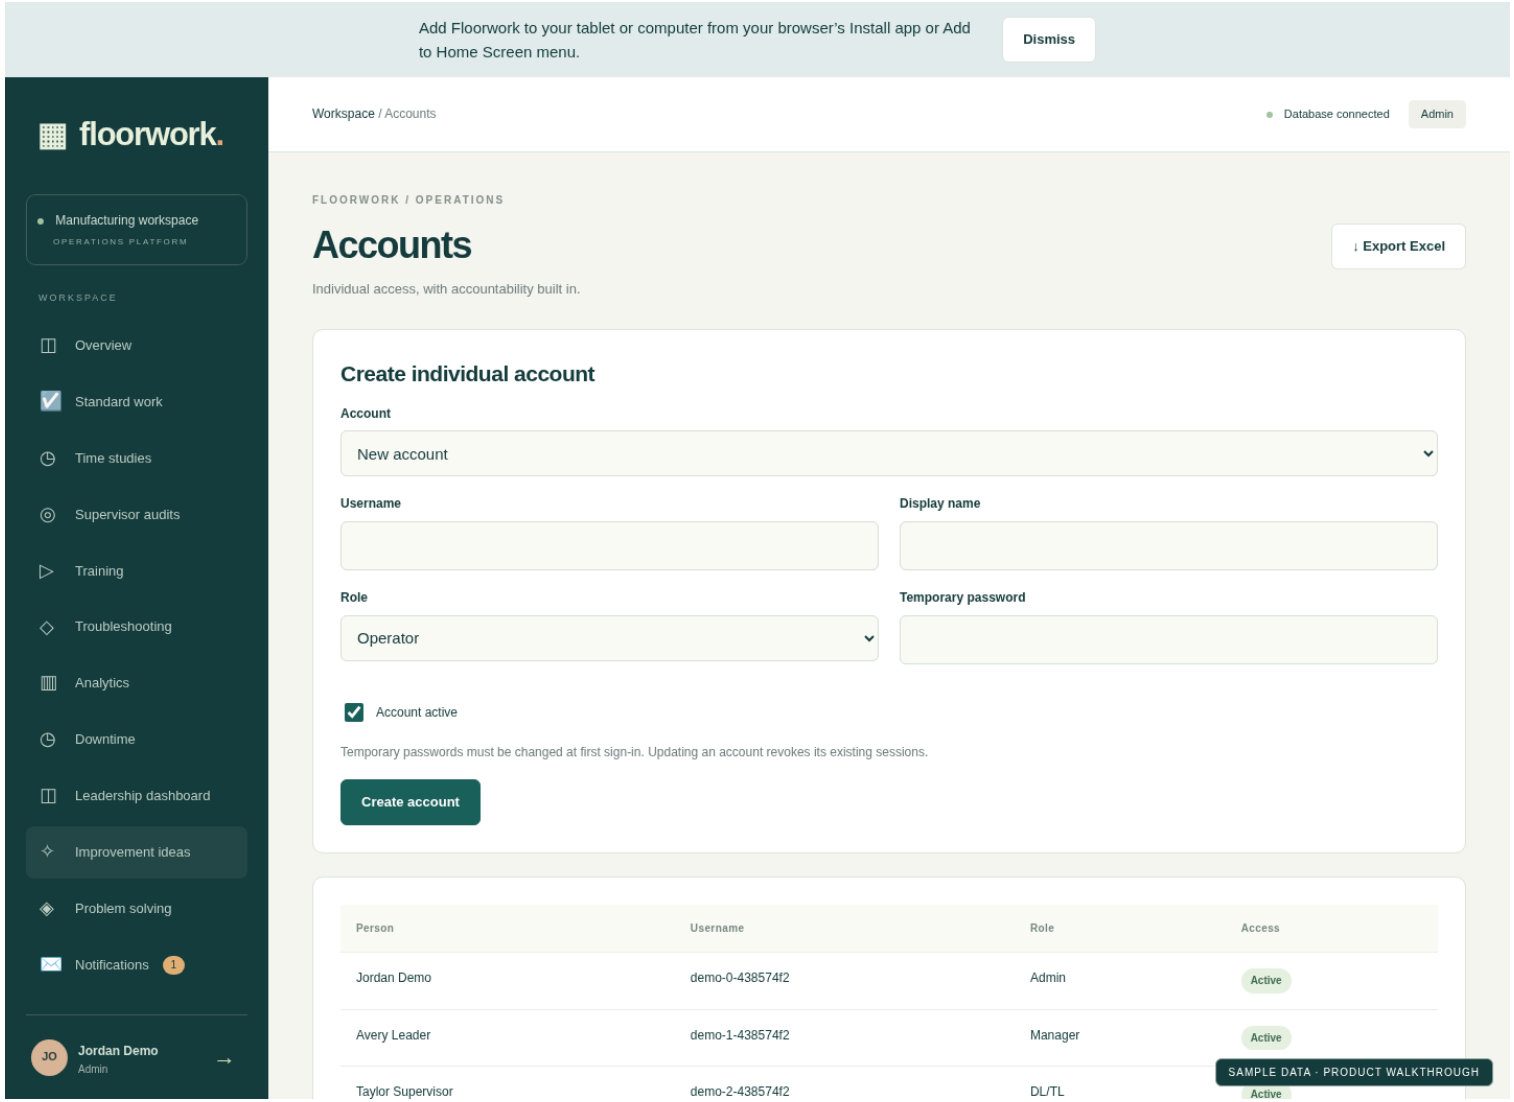

Create equipment hierarchies, author Yes/No steps, require photos, set targets/tolerance and publish immutable standard revisions.

Full forms, histories and reports are in the full-size PNGs and HTML gallery. · 22-manage

Account administration

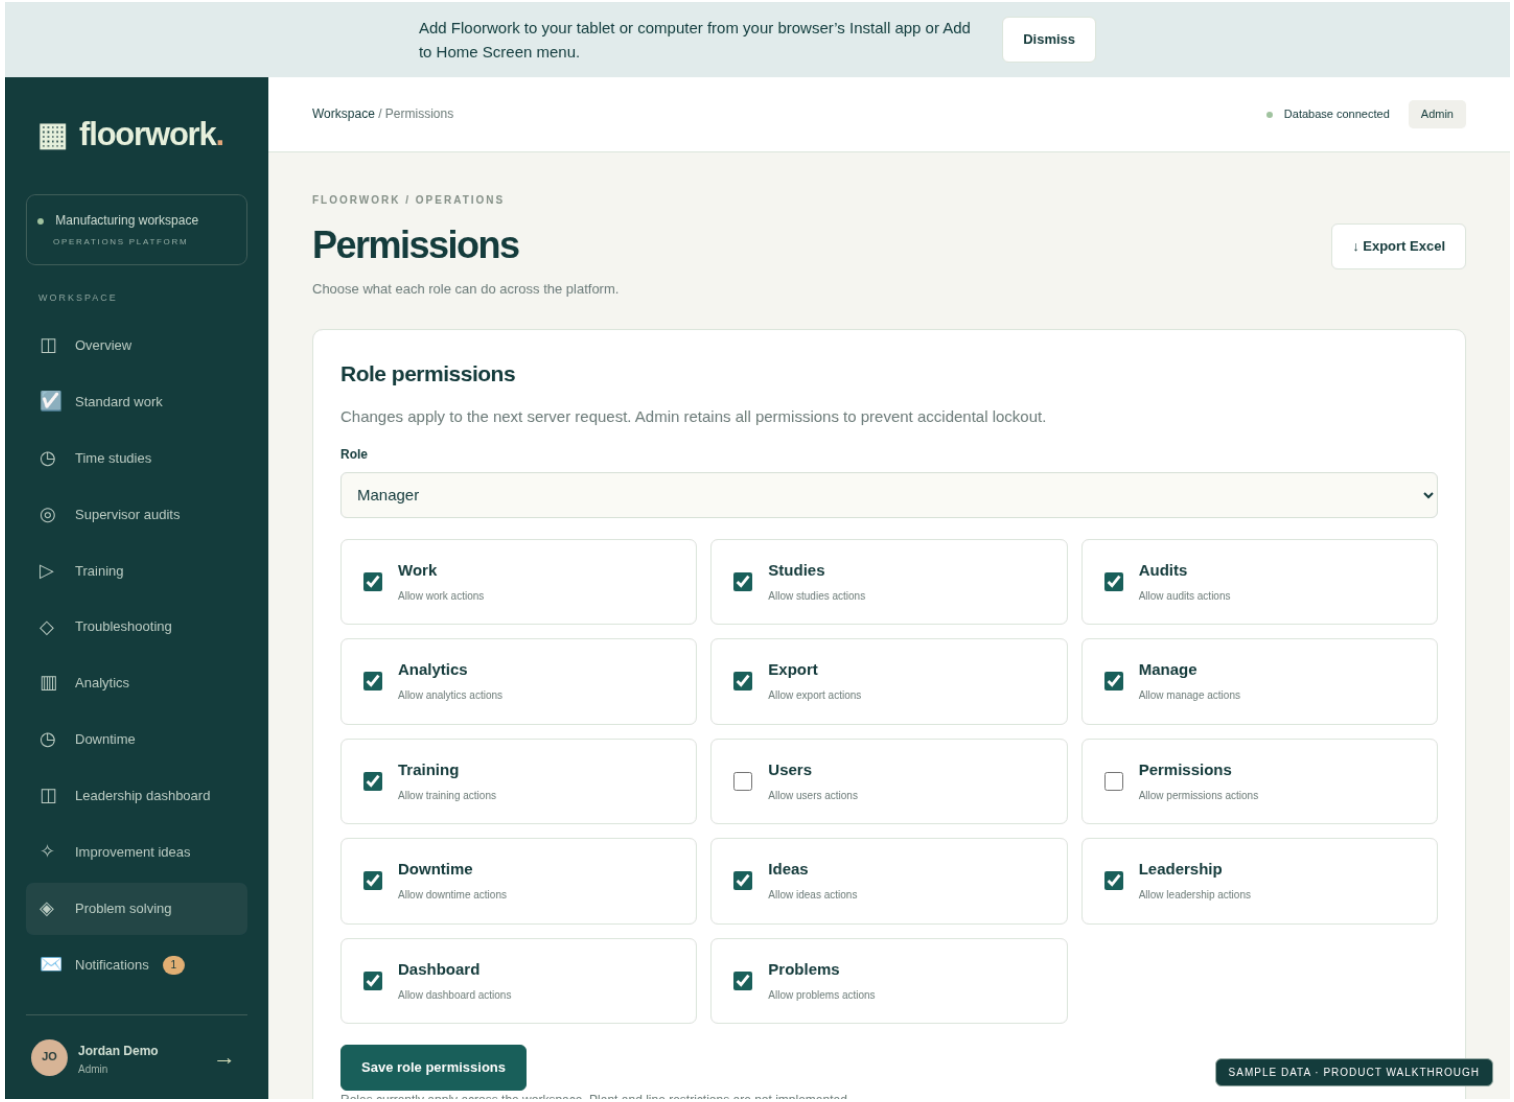

Create or update individual users, assign a role, reset access and deactivate accounts. No sample credentials are included in this gallery.

Full forms, histories and reports are in the full-size PNGs and HTML gallery. · 23-accounts

Role permissions

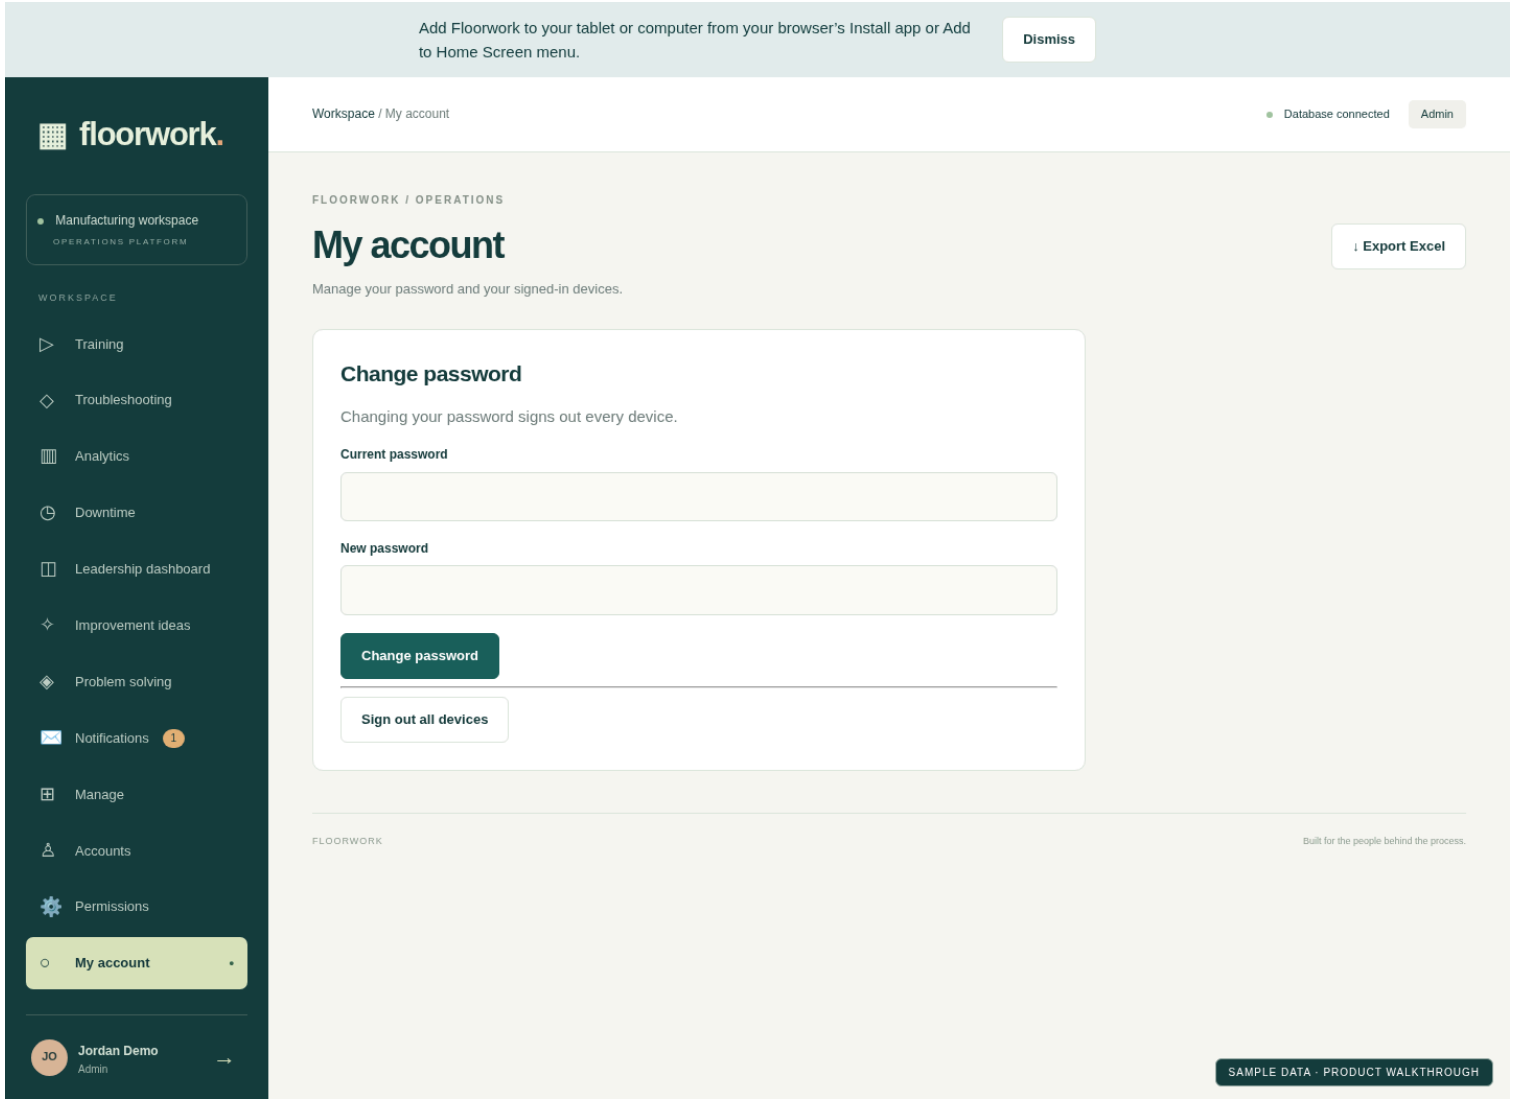

Configure server-enforced grants for each role, including the new Problem Solving section.

Full forms, histories and reports are in the full-size PNGs and HTML gallery. · 24-permissions

My account and session controls

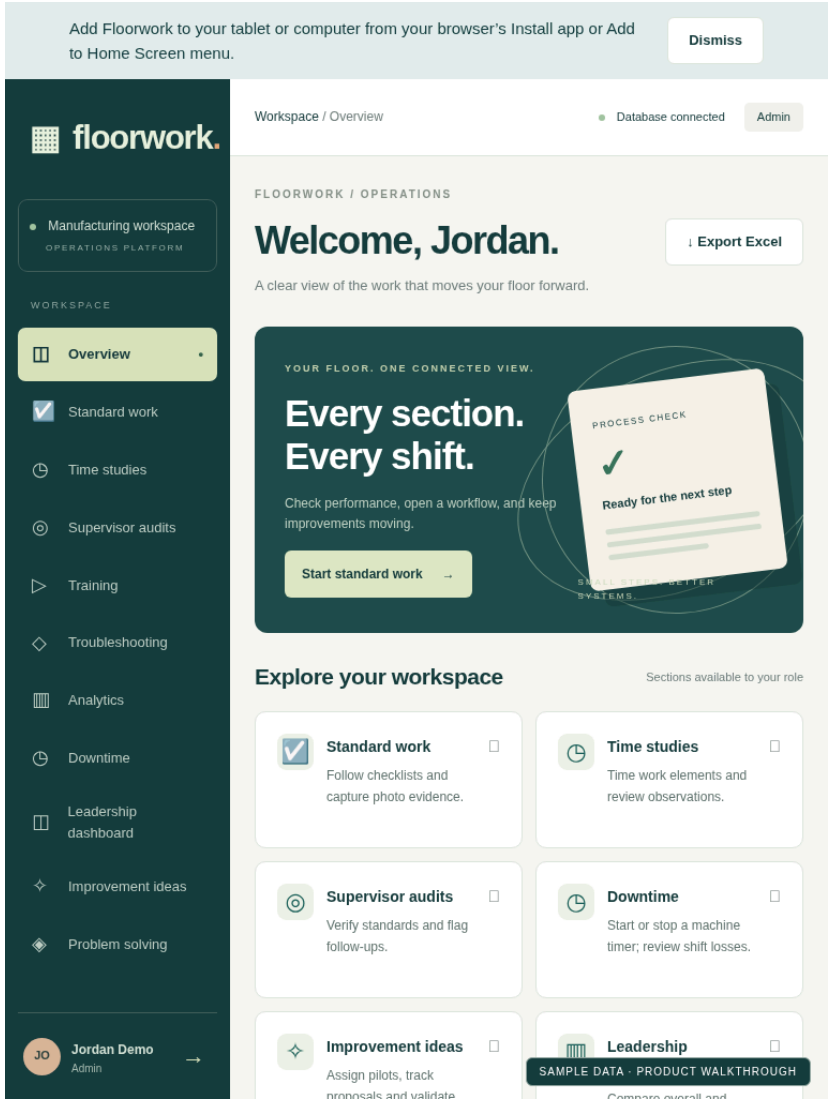

Change your password and revoke other remembered sessions.

Full forms, histories and reports are in the full-size PNGs and HTML gallery. · 25-my-account

Tablet dashboard

The actual overview at a 768-pixel tablet width, with touch controls and responsive section cards.

Full forms, histories and reports are in the full-size PNGs and HTML gallery. · 26-tablet-dashboard

Mobile dashboard

Single-column section cards and horizontally scrolling navigation on a phone-sized viewport.
